

Environmental Policy Statement

Francotyp-Postalia Ltd (FP Mailing) are the UK subsidiary of Francotyp-Postalia Holding AG. For nearly 100 years we have been operating in the UK, and for over 21 years we have been simply known as FP. Innovative and technologically advanced.

We have always been at the forefront of innovation introducing the first automatic franking machine, the first electronic franking machine, the first digital franking machine, first inkjet machine and more recently the first multi-carrier machine to meet the new de-regulated age.

In these times of global climate change, we all need to do our part to protect the environment for future generations. We are committed to conducting our business in a manner that minimises harmful impacts on the environment and prevents pollution, whilst making the most efficient use of natural resources. Our core business operation is continually monitored and reviewed to ensure our processes result in minimal environmental impact. We set environmental objectives to monitor and measure our activities where they could have an adverse effect on the environment and are committed to continually improve our environmental performance wherever there is the potential to do so.

We are committed to:

- Making sure that machines manufactured since 2006 are RoHs compliant,
- Reducing pollution by recycling and minimising landfill,
- Using recyclable packaging wherever possible,
- Using incoming delivery boxes to ship goods out wherever possible,
- Offering the option of remanufactured machines to our clients,
- Reducing the amount of waste sent to landfill,
- Encouraging staff to be energy efficient,
- Setting annual targets to reduce our energy bill,
- Meeting our compliance obligations,
- Continually improving our environmental management system to enhance our environmental performance.

In addition, we support our customers environmental objectives by offering an easy recycling solution for their used postage meter inkjet cartridges through the FP Mailing and HP Planet Partners Return and Recycling Program.

This policy is communicated through internal processes to all employees and those working on our behalf. It is available to external interested parties on request.
