

TF MEGA-A plus Folding machine

TF MEGA-A plus

Folding machine

Comfortable to use with top results – with fully automatic fold type adjustment

The solid and durable table top folder TF Mega-A plus is an extremely economic solution to folding even high volumes of paper fast and precisely.

The TF MEGA-A plus is versatile and easy to operate.

This folding machine can handle documents up to paper format A3.

The adjustment of the folding plates is done fully automatically and in no time:

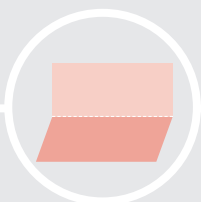

Select your application by pressing a button and the TF Mega-A plus starts folding.

The TF MEGA-A plus handles the paper with a maximum speed of 14.400 sheets/h.

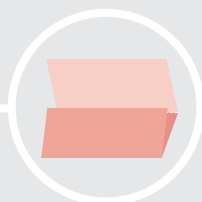

The capacity of the automatic feeding station is max. 500 sheets. The job counter indicates the number of sheets already processed.

A conveyor stacker guarantees an accurate storage up to 300 sheets. Any adjustments – depending on the size and fold type – are done automatically.

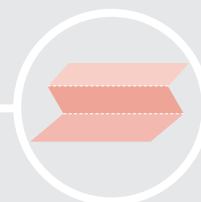

Furthermore, the TF MEGA-A plus is equipped with a digital pre-counter (count-down-function) with interval mode. This will allow the machine having short brakes after a fixed number of folded sheets so that the operator can remove a fixed number of documents without stopping the machine.

Folding from A6 up to A3: with fully automatic fold type adjustment

Convincing technical specifications

The TF MEGA-A plus offers:

- 7 different fold types up to paper format A3, including cross fold
- Digital display (English language) with a 4-digit job and pre-counter, interval mode and status indication
- An automatic feeding station with a capacity up to 500 sheets
- 2 folding plates with fully automatic adjustments
- Centered form width alignment
- Adjustable paper separation
- Adjustment of the paper pressure. Advanced processing of different paper weights.
- Paper out and jam control as well as double sheet protection
- Automatically adjusted conveyor stacker, according to the paper size

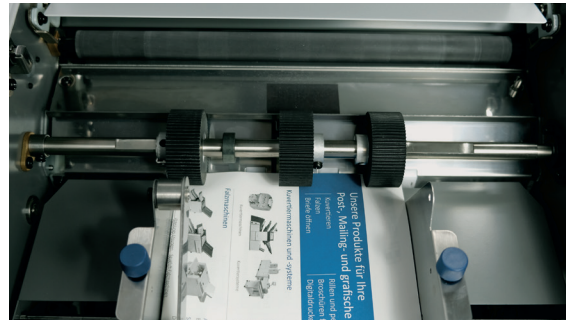

Highlights of the TF MEGA-A plus version

- Fully automatic adjustment of the folding plates
- Fully automatic adjustment of the stacking unit
- 7 fold types
- 14.400 sheets/h
- Power saving mode
- Pre-counter with interval function

1 Simple operation

Clear control panel in English language

3 Flexible feeding

Moveable feeding roller (left) for an improved feeding with different formats and cross fold

2 Variably adjustable

Adjustment of paper pressure and paper separation for various paper weights

4 Perfect stacking

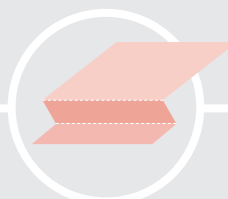

Large, extendable conveyor stacker for up to 300 folded sheets
