

FPI 700 inserting system
Speed up your operations

FPi 700.

The new inserting system.

Free your team from tedious routine work.

As you undoubtedly know, folding and inserting letters manually is an extremely time-consuming task. Now it's time to ramp up your daily mail processes.

The new FPi 700 table-top inserter allows you to feed, fold, insert and seal letters automatically. Quite simply, the FPi 700 is the ultimate small-office solution for inserting letters.

Easy2use

Intuitive, multilingual guidance via the new 5" colour touchscreen

Versatile

Add response cards, flyers or return envelopes to your letters. Use the optional upgrade set to produce your own flyers (with three pages of the exact same size).

The clam-shell design allows you to quickly install the set and easily resolve any paper jams.

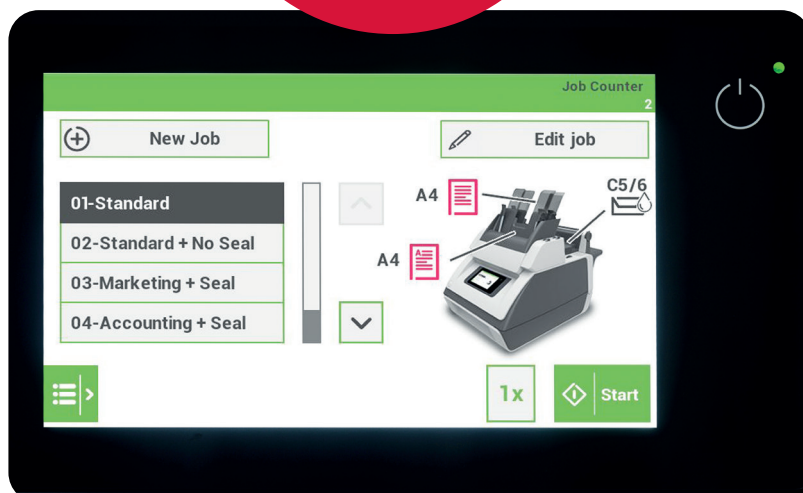

Powerful and reliable

Up to 1,350 letters per hour. The integrated **double-sheet control** reliably prevents letters from being inserted incorrectly.

Helps your office and the environment

The compact table-top inserter offers a whole range of functions and fits in any office.

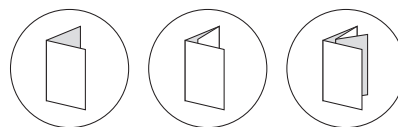

The FPi 700 pays its way from just 50 letters per day, offering exemplary low noise emissions of 65 dB(A), a consistent eco-concept with low-consumption standby mode and an automatic switch-off function.

Automate
90%
of your tasks!

- 2 Documents
- 1 Enclosure
- 1 Return envelope
- C6/5, C5, #10, 6x9.5" Envelope
- Daily mail

Choose from different modern fold types used in offices: single fold, letter-fold and double parallel fold (left to right).

It's so easy:

- Simply place your letters, enclosures and envelopes in the relevant stations. The clearly structured display will guide you through the entry menu.
- Recurring tasks (sequence of documents, fold type, folding dimensions, address position and so on) can be saved and called up at the touch of a button. Each (perfectly coordinated) feed station can hold 100 documents, envelopes and return envelopes.
- The **tandem function** ensures that one station continues working without interruption when the other is empty. This reduces the need to reload during large mailing tasks.
- **"Daily mail" function:** Mixed documents of up to 5 sheets can be fed in manually. An enclosure or return envelope can be added automatically.

FPI 700 inserting system

Technical data

Recommended monthly volume	up to 3,000 letters
Inserting speed	
Letters/hour	up to 1,350
Operating concept
