

# Viessmann Spare Parts App

Looking to find out what spares you need to repair a boiler? With the Viessmann Spare Parts App this is easy, simply enter the product serial number or scan the barcode and receive instant results.

## Where to get the app:

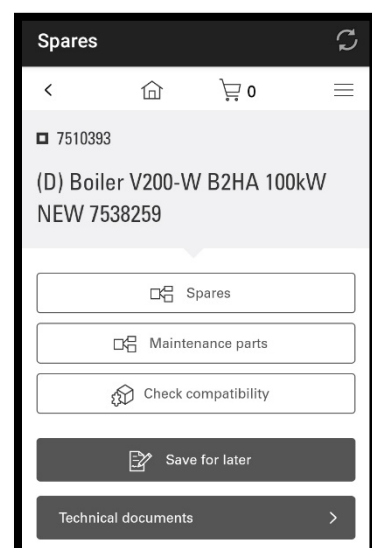

1. Open the app store on your device
2. Search for 'Viessmann Spare Part App' and install

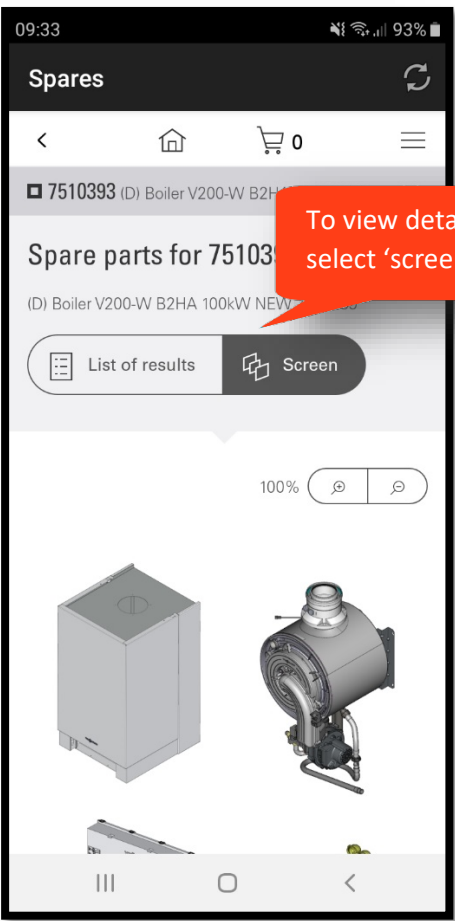

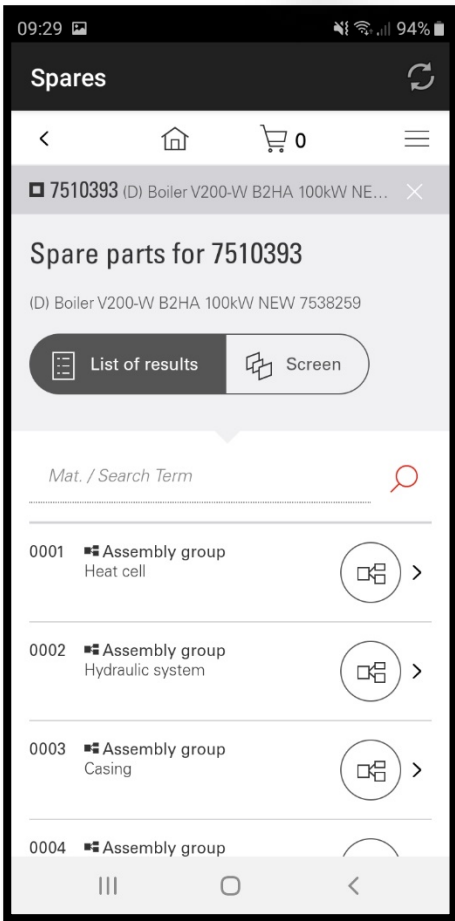

Search for your product using either the search bar or barcode scanner.

If you don't know the spare part number simply enter the boiler name to find all relevant parts.

Click on a result, then select 'spares', 'maintenance parts' or 'check compatibility'. 'Save for later' allows you to add this product to your watchlist and revisit along with any other saved parts. A very handy feature is that you can also view the technical documents related to the part.

Once you have selected a result, you have the option to further filter by category to narrow your search.

To view detailed drawings of the products, select 'screen' then click 'exploded drawing'.

Adding an item to your basket then allows you the option to attach details of your desired spare parts to an email or message, to easily send to your local merchant to ask about stock.
