

**Who responds  
immediately when  
things get critical?**

Siemens is there for you with quality products, responsive on-site service, and exceptional training for blood gas systems.

Answers for life.

**SIEMENS**

At Siemens, we've got the  
**quality** and **innovation**  
you need to succeed.

Partner with one of the most experienced names in healthcare.  
We're dedicated to continuing improvements to make your life simpler.

## A partner you can trust.

When you need a blood gas system that delivers results and a company that shares in your ultimate goal of improving patient care, Siemens is the one to count on to meet these needs—today and in the years to come.

- More than 45 years of blood gas experience
  - On-site training for blood gas system implementation
  - Dedicated field service teams with extensive expertise to ensure optimal product performance
  - State-of-the-art connectivity solutions coupled with world-class analyzers, working together to improve risk management and contribute to better, more cost-effective healthcare
  - New products and feature upgrades that continue to increase system functionality to meet escalating testing needs
- Neonatal total bilirubin (nBili), a test that helps identify potential complications in newborns, is a new addition to RAPIDLab® 1200 Blood Gas Systems. Since the test is designed specifically for the measurement of total bilirubin in whole blood from newborn infants, it requires very small amounts of blood.

## An outstanding value.

Siemens provides healthcare professionals with quality products. This legacy, combined with our excellent service, support, and education, makes Siemens critical care systems a tremendous value.

- Incremental software and feature upgrades add functionality
- Improved ease of use and performance reduce hassle and enhance workflow
- Critical care symposiums improve skills of end users while offering continuing education opportunities
- Online educational portals offer instrument training and clinical education
- Outstanding service, support, and education add more value and further enhance uptime

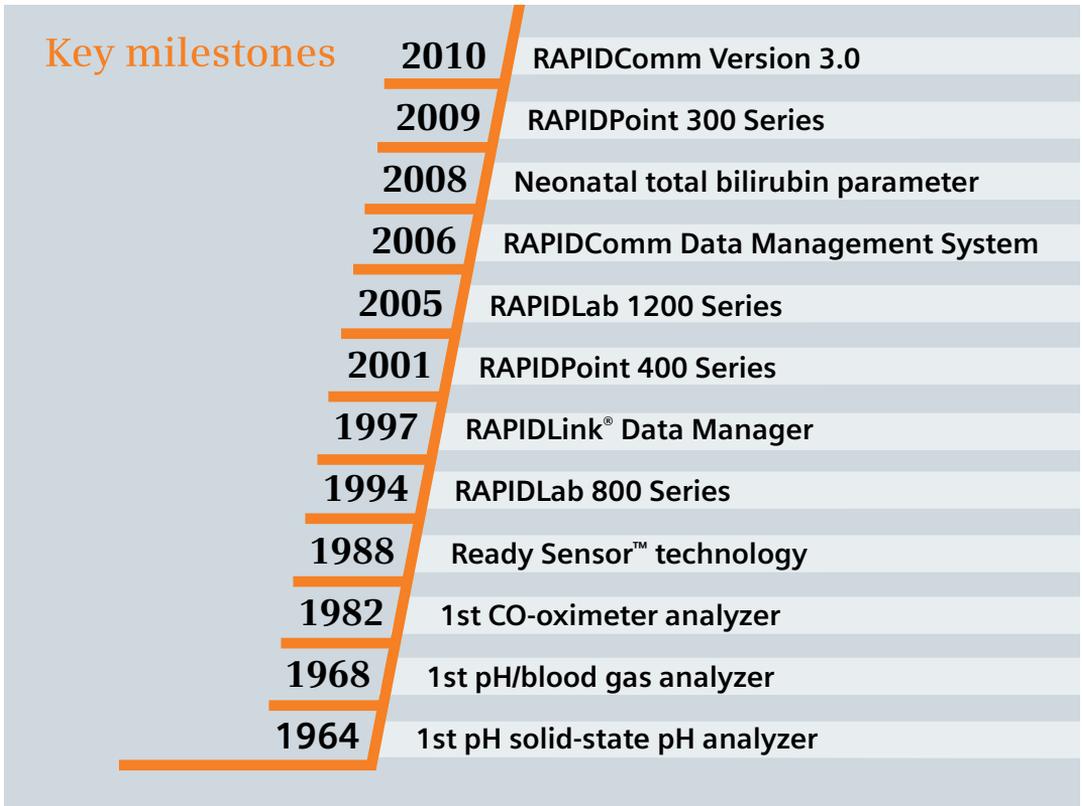

Siemens offers blood gas and data management solutions designed to meet the needs of today's critical care environment, no matter what the testing volume.

- RAPIDLab 1200 Blood Gas Series offers accurate results in 60 seconds, as well as an all-inclusive test menu with blood gas, electrolytes, metabolites, neonatal total bilirubin, and full CO-oximetry—all from a single sample
- RAPIDPoint® 400/405 Blood Gas Systems provide a fast turnaround time, a comprehensive test menu, as well as the speed and accuracy to help clinicians make timely decisions
- RAPIDLab 248/348 and RAPIDPoint 340/350 Blood Gas Systems offer accurate results, maximum uptime, and minimum operator involvement
- RAPIDComm® Data Management System provides unparalleled centralized data control and system management of Siemens Blood Gas and Urinalysis Analyzers; a single interface connects these POC analyzers to the LIS while monitoring and controlling remote analyzers from any hospital workstation

# A commitment to growth.

As a longtime leader in healthcare, Siemens is always looking ahead. Continuing customer surveys guide us toward innovations in new products and enhancements, customer support, and educational programs that can make a difference to your laboratory. We're dedicated to meeting your needs as we pave the path together toward enhancing critical care in the clinical lab and at the point of care.

- Continuous system enhancements focus on delivering improved ease of use, increased uptime, and enhanced workflow
- New applications are being developed on all platforms for future release
- Future-ready with RAPIDComm® Data Management System for point of care—going beyond blood gas to incorporate urinalysis testing as well
- A broad portfolio of performance-driven laboratory and POC solutions provides more effective ways to assist in the diagnosis, monitoring, and management of critically ill patients
- Substantial investments and resources invested in customer education and service

“Upgrading to Siemens RAPIDPoint 405 Blood Gas Analyzers was the best choice that our health system could have made. It has had such an impact on patient care, as well as department productivity. We could not be happier!”

Robin Adams, Chief Technologist,  
ABG Laboratory, Cape Fear Valley Medical Center

Voted readers' favorite vendor for blood gas testing products. Survey respondents included healthcare professionals at all levels of pulmonology, respiratory care, and sleep medicine.

Top of the Class awards,  
ADVANCE for Respiratory Care and Sleep Medicine  
September 2009

Siemens Healthcare Diagnostics, the leading clinical diagnostics company, is committed to providing clinicians with the vital information they need for the accurate diagnosis, treatment and monitoring of patients. Our comprehensive portfolio of performance-driven systems, unmatched menu offering and IT solutions, in conjunction with highly responsive service, is designed to streamline workflow, enhance operational efficiency and support improved patient care.
