

Two Exams in One

**Biograph mMR — for whole-body,
simultaneous MRI and PET**

Now at ABC Imaging Center | 123 Main Street, Townsville Shopping Center | 800-000-0000 | www.abcimaging.com

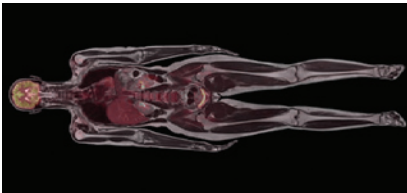

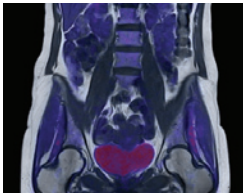

Do you need MRI and PET exams?

Biograph mMR makes it simple to have both exams in just one visit. It's the world's first system that performs simultaneous, whole-body MRI and PET scans. That means you only need one appointment instead of two and you may wait less time for the results.

Your doctors will also get a more complete picture of your body's internal structure and cellular activity, thanks to Biograph mMR's precisely aligned images. Biograph mMR makes it all possible – with a lower radiation dose compared to other imaging exams.

Ask your healthcare providers about the new 2-in-1 Biograph mMR today. It's available at our imaging center.
