

# syngo.Breast Care

syngo.Breast Care<sup>1</sup> is the client-server application for state-of-the-art mammography and unique tomosynthesis<sup>1</sup> reading – marked by outstanding flexibility. Shape your workflow according to your personal preferences. Compare prior and follow-up exams. Set your layouts, sizes, and tools. And include images from other modalities you need, such as ultrasound and MRI – wherever<sup>2</sup> you are, even with simultaneous users.

In short, syngo.Breast Care completely fulfills your need for high quality and efficient daily work – anywhere<sup>2</sup>.

## Efficient

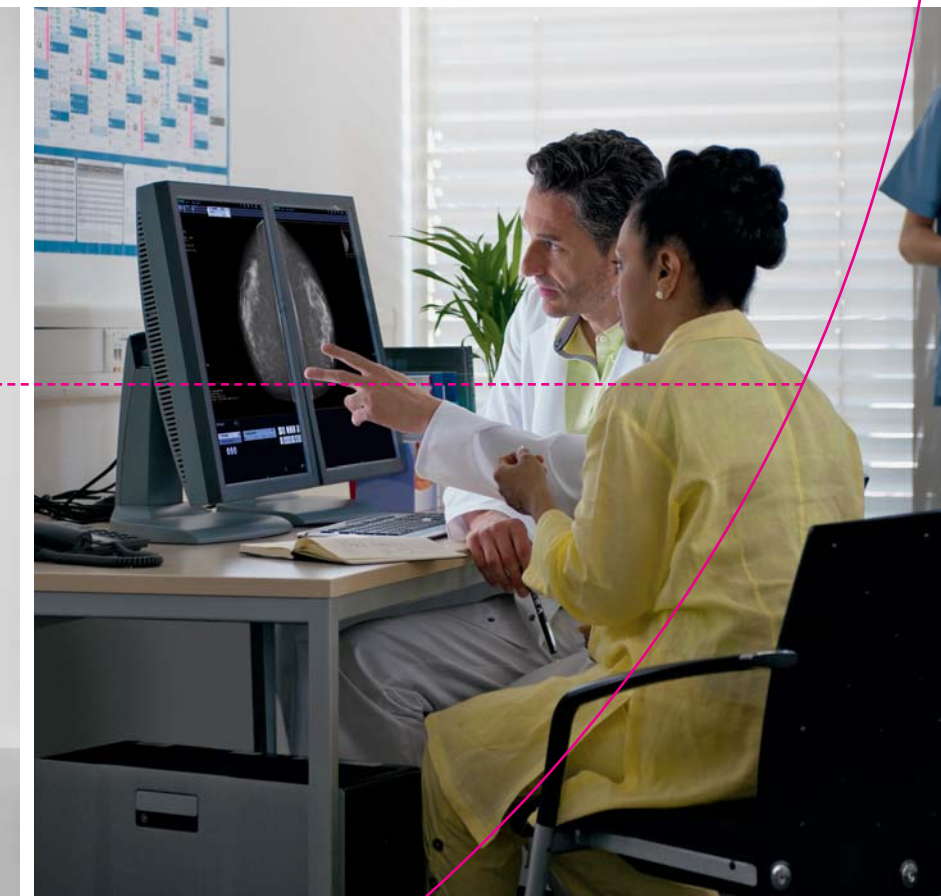

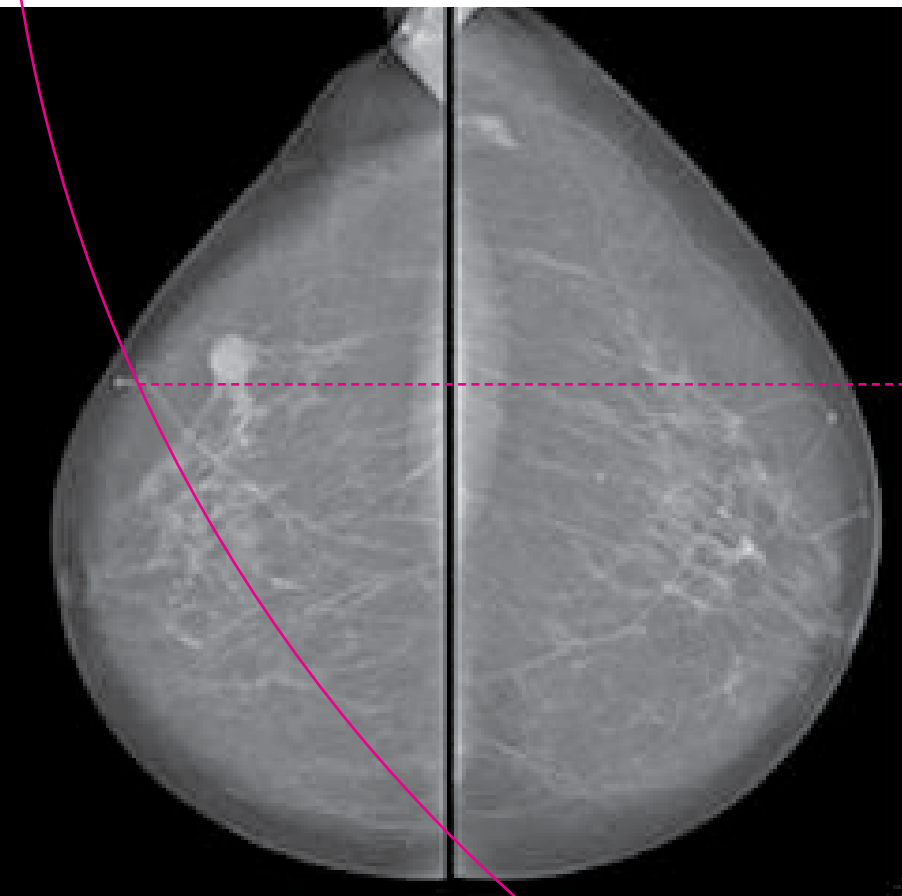

- Efficient reading – combined with high diagnostic confidence
- Immediate image availability – thanks to automated workflow selection
- Any detail you need – in 2D mammography, 3D tomosynthesis, or in new applications to come

## Flexible

- Reduced Total Cost of Ownership – today and in the future
- Select the variant that fits, regardless of the hardware<sup>3</sup> you use – and upgrade it with new functionalities whenever you like
- Benefit from an open, flexible, client-server based environment

## Intelligent

- Flexible workflow – work just the way you like
- Mammography and multi-modality 3D/4D images – intelligently combined in a single workplace
- Easy sharing wherever<sup>2</sup> you are – even on your mobile PC<sup>4</sup>

<sup>1</sup> syngo.Breast Care and tomosynthesis are not commercially available in all countries. Due to regulatory reasons their future availability cannot be guaranteed. Please contact your local Siemens organization for further information.

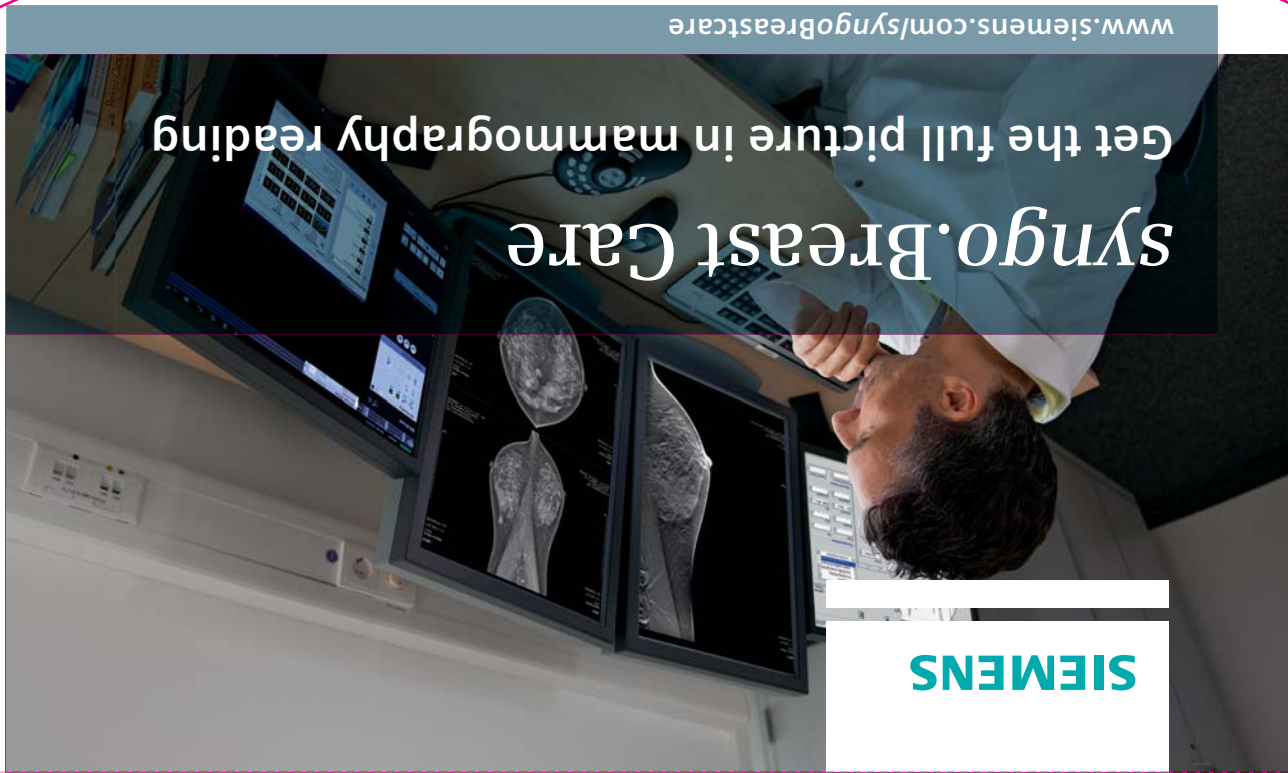

<sup>2</sup> Prerequisites include: Internet connection to clinical network, DICOM compliance, meeting of minimum hardware requirements, and adherence to local data security regulations.

<sup>3</sup> Minimum hardware requirements must be met.

<sup>4</sup> Diagnostic reading requires a medical grade screen. Observe country specific regulations for usage of mobile devices.
