

www.siemens.com/MAGNETOM-ESSENZA

Taking care of your patient from head to toe.

Breast

Streamline your workflow in clinical breast cases, including breast implant assessment and therapy monitoring.

Pediatric

Achieve excellent contrast and resolution with agedependent protocols, using ultra-fast and motion correction techniques.

Ortho

Examine ligament tears to cartilage degeneration with high-resolution imaging and a wide range of dedicated coils.

Cardiac

Easily answer clinical questions, from cardiomyopathies to ischemic heart disease, and valvular to congenital heart diseases.

Neuro

Excellent performance and pristine image quality for standard and advanced applications, in 2D or 3D, e.g. submm isotropic resolution with *syngo* SPACE.

Angio

Easily depict vessel diseases with contrast and non-contrast enhanced techniques.

Onco

Provide state-of-the-art oncology services for tumor detection and staging of prostate, liver cancers, and more.

Body

Perform high-resolution free-breathing abdominal studies like MRCP or fast single-breathhold 3D abdominal scanning with CAIPIRINHA.

MAGNETOM ESSENZA delivers outstanding image quality from head-to-toe. Its Tim® Application Suite, comprises the Neuro, Ortho, Body, Angio, Cardiac, Breast, Oncology, and Pediatric* suite, supporting a complete range of routine and advanced clinical applications helping to answer an impressively broad range of clinical questions.
