

Tackling industry challenges with a Managed Equipment Services partnership

A Siemens MES provides a proven partnership model ensuring healthcare providers can focus on their primary concern – patient care.

As hospitals strive to improve efficiency and workflow to enhance clinical outcomes, the concept of a flexible partnership with a global pioneer of sustainable healthcare solutions can help to achieve improved quality of care and deliver operational excellence.

Financial constraints
As budget constraints face the Canadian healthcare system, funding upfront capital costs has become a challenge for healthcare providers.

Technology evolution
Technology continues to advance at a rapid pace, meaning it can be hard for hospitals to keep up-to-date with the latest innovations.

Ensuring efficiency
Healthcare institutions are expected to operate efficient services, requiring improvements in many aspects of working including staffing, patient throughput and spending.

Growing population
Patient numbers are constantly growing, and an aging population is presenting more complex chronic diseases, leading to hospitals struggling to keep pace.

Performance pressures
Many healthcare institutions are measured on performance and wait times, as well as their work in reducing risk and ensuring compliance.

Changing landscape
The healthcare environment is ever changing and each province and territory in Canada faces its own unique challenges from disease prevalence to funding availability.
