

Biograph mMR

Advanced Application Advisory Service

Explore the capabilities of your mMR MR-PET system

The introduction of the world's first commercially available hybrid MR-PET system enables healthcare providers to set the pace in medical imaging and meet the highest standards in diagnostic accuracy – regardless of whether acting in the clinical or the scientific field. To enter this rapidly expanding area and to keep pace with the progressive innovations and applications in the MR-PET field, it is crucial that you can rely on the expertise of your specialist.

If you want to explore the full potential of this system you will need the support of dedicated, experienced and high-qualified experts. As the vendor of MR-PET systems Siemens Healthineers understands what type of service is required to fit your needs and therefore provides the Advanced Application Advisory Services program for MR-PET systems. Our specialists are highly qualified operators who belong to a group of top experts for MR-PET systems. With experience and expertise in various fields, reaching from diagnostic imaging to their own scientific research they empower you to set the pace in hybrid imaging.

Siemens Healthineers Biograph mMR specialists will support you in:

Starting new research projects

MR-PET research projects are highly demanding since different data from MR and PET must be acquired and correlated. Often support from various departments is necessary. Our Siemens Healthineers Biograph mMR specialists can provide you advice on **how to build up new research projects** and answer questions such as: **which research projects are relevant** now and in the future? **What projects can be approached with the current setting and what hard- and software is required?**

Setting up the respective workflows for research projects

The simultaneous acquisition of different MR and PET data makes MR-PET research workflows very complicated. The Biograph mMR Specialist will help to decide **which data should be acquired and how to analyze it**. And of course you will also receive support **in implementing an efficient and effective workflow**.

Building up workflows for successful starts in clinical applications:

Using the Biograph mMR system for clinical diagnosis, parallel to research work can be a challenge. Therefore Siemens Healthineers provides additional support in **developing disease specific workflows** for examination protocols. Our experts also train your staff to ensure their ability to manage a **smooth transition between the clinical diagnosis and research fields**.

With the Advanced Application Advisory Services our specialists will assist you in entering the field of MR-PET research; support you in expanding your clinical capabilities; and widen your scientific approaches with your Biograph mMR system.
