

# Barnet Hospital

## NHS Foundation Trust (UK)

### A long-term MES partnership that goes the extra mile

A 33 year Managed Equipment Services (MES) agreement in place at Barnet Hospital, part of Royal Free London NHS Foundation Trust, is ensuring the ongoing provision of the latest medical equipment. The £162 million contract with the Metier Healthcare consortium is led by Siemens Healthineers, covering everything from syringe pumps through to state-of-the-art MRI and CT systems in a complete multi-vendor service. Siemens Healthineers is responsible for supplying, managing, and maintaining over 2,500 pieces of equipment in the 458-bed hospital.

*"We've effectively ring-fenced the money that we need to invest annually in medical equipment and we have a rolling program for replacing machines at predetermined intervals, which means we're very well-equipped."*

Dr. Andy Nicol, Clinical Director of Surgery and Anaesthetics at Barnet Hospital, Royal Free London NHS Foundation Trust

### At a glance: MES at Barnet Hospital

- Guaranteed funding – no longer an internal competition for capital funding
- Improved maintenance – systems are actively managed and maintained
- Minimal downtime – helping to ensure waiting list targets are met decision making
- Reliability and responsiveness – a team that rapidly responds to issues
- Partnership approach – effective teamwork for a seamless service

The products/features and/or service offerings (here mentioned) are not commercially available in all countries and/or for all modalities. If the services are not marketed in countries due to regulatory or other reasons, the service offering cannot be guaranteed. Please contact your local Siemens Healthineers organization for further details. The statements by Siemens Healthineers customers described herein are based on results that were achieved in the customer's unique setting. Since there is no "typical" hospital and many variables exist (e.g., hospital size, case mix, level of IT adoption) there can be no guarantee that other customers will achieve the same results.

### MES in action – a rapid response team:

Siemens Healthineers provides a specialist on-site team at Barnet Hospital that consists of five engineers, an MES manager, a regional manager, a supervisor, and three admin staff to ensure a rapid support level.

A water pipe burst at Barnet Hospital and flooded the A&E department below, which in turn caused damage to the CT system in place.

Siemens Healthineers was able to provide a replacement system which was in action and servicing patients within 16 hours. A combination of great teamwork and an aptitude for problem solving were factors to ensure a rapid response and minimal downtime.

*"The Trust certainly expects Siemens Healthineers to keep them at the forefront of technology, but more than anything else they want reliable equipment and a team that rapidly responds to any issues that may arise."*

Steve Bagot, Operations Director at Metier Healthcare
