

# They Deserve a Quiet Suite

Help them experience complete, quiet MRI exams that reduce patient anxiety.

Many Service Members and Veterans struggle with Post-Traumatic Stress Disorder (PTSD), traumatic brain injuries, and/or sensitivities to loud noise. For them, the loud noise common to standard MRI exams could trigger an uncomfortable and even disturbing experience. This may cause them to move during an exam, resulting in MR images that may reduce a physician's clinical confidence. Moreover, to avoid the experience, they may opt out of clinically valuable MRI exams entirely.

## Supporting Better Patient Tolerance and Better Clinical Certainty

Quiet Suite is an advanced noise reduction technology that lowers sound pressure without compromising diagnostic imaging quality.

Available on the MAGNETOM® family of MRI scanners, Quiet Suite:

- Provides complete, quiet exams for neurology and orthopedic procedures.
- Enables up to 97% reduction in sound pressure.<sup>1</sup>
- Is not coil-limited; no special coils are necessary.

<sup>1</sup>Data on file. Results may vary.

MRIs provide vital, actionable clinical information for patients and their physicians. Unfortunately, however, the rapid switching of gradients during a traditional MRI exam generates significant, and often traumatic, mechanical vibrations, similar to a jackhammer. This sound pressure can raise anxiety levels in patients—particularly those who are already sensitive to noise.

## Revolutionizing the MRI Experience for Improved Patient Comfort

**Quiet Suite supports a more comfortable MRI exam for Service Members, Veterans, and their families so healthcare providers can:**

- Limit repeat exams.
- Better support higher levels of clinical confidence in MRI imaging.
- Avoid unnecessary dose exposure by using MRI instead of CT.

### Committed to those who serve

The U.S. Military, Veterans, and their families deserve the very best healthcare possible—care that both improves patient comfort and offers the clinical information necessary for sound treatment decisions.
