

CLINITEST hCG Test

Automated and Connected

CLINITEST® hCG Pregnancy Test and CLINITEK Status® Family of Analyzers

Bring your hCG urine pregnancy testing to the next level with a simple and automated solution to standardize the testing process. Achieve speed, convenience, and confidence in test results unmatched by visual reading.

Eliminates error sources

- Accurately times the test for you—no watching the clock!
- Automates and removes subjectivity of result interpretation.
- Automatically transmits test results to minimize transcription errors.

Improves workflow efficiency

- Frees staff for patient care with true walkaway operation—add sample and the analyzer does the rest.
- Results in 5 minutes or less—no waiting for lab results.
- Optional bar-code scanner saves time, simplifies data entry, and eliminates transcription errors.

Provides fail-safe measures

- Proprietary Auto-Checks® technology on Multistix® Reagent Strips prevents testing if expired materials are used or quality-control testing fails or is not performed.
- Provides a unique flag for results in the “indeterminate” range where confirmatory testing is important for interpreting the significance of low-level hCG in qualitative tests.
- Operator lockout—prevents use by unauthorized users.

Improves data capture and traceability

- Device connectivity provides:
 - 100% data capture
 - Automatic result recording and transmission to EMR/EHR or LIS/HIS
- Audit-ready—each test result is linked to patient ID, operator ID, material lot number, and expiration date.

Pregnancy testing is simpler and more reliable with the CLINITEST hCG test.

CLINITEST hCG pregnancy test

The CLINITEST hCG pregnancy test is a lateral-flow, qualitative test with the following key specifications:

- 200 µL urine sample size
- Test results as fast as 2 minutes for a positive test, and 5 minutes to confirm a negative test
- Room-temperature storage
- Sensitivity of ≥ 25 mIU/mL
- >99% clinical accuracy
- Reported results: negative, positive, and borderline*

Ordering Information

Product Code	Description
10310618 (1760)	CLINITEST hCG test (25 tests)
10470849 (1797)	CLINITEK Status® Connect System, CLINITEK Status®+ Analyzer, CLINITEK Status Connector, and bar-code reader
10379675 (1780)	CLINITEK Status+ Analyzer
10376323 (1790)	CLINITEK Status Connector
10484591	CLINITEK Status Upgrade Kit (includes connector base and bar-code reader)
10282579	Bar-code Scanner

Gonadotropin, Chorionic (hCG), qualitative: CPT Code 84703

*Borderline test results are considered indeterminate and must be repeated within 48–72 hours.

hCG testing is as easy as 1-2-3

1

Insert the cassette into the analyzer.

2

Press the Start button.

3

Add entire contents of pipette.

Pipettes included with cassette purchase.

Flexible Connectivity Options

	Communication	Interfaces
CLINITEK Status+ Analyzer	Unidirectional	Siemens Healthineers data-management solutions; Telcor, RALS, EMRs via data-management software
CLINITEK Status Connect System	Bidirectional	Siemens Healthineers data-management solutions; Telcor, RALS, EMRs via data-management software
