

PETNET Direct

A comprehensive suite of
practice management tools

PETNET Direct, an integral part of MI PET Source™, is a web-based practice management solution to streamline your operations. PETNET Direct integrates scheduling, dose ordering, invoicing, reporting, and dose credit requests into one application; providing solutions to improve daily workflow.

A key feature in PETNET Direct is the Ordering Physician Database. This Ordering Physician Database is an easy way to find an ordering physician based on their National Provider Identifier (NPI) and specialty or sub-specialty. Once the correct physician is found, you can easily add them to your list of physicians. This new feature simplifies the ordering process by enabling you to easily choose the correct physician from your personal drop down list of physicians. Not only will you save time, but your reports will be more accurate since there is no manual input needed. In addition, the Ordering Physician Database allows you to quickly create a mailing list to support your physician outreach programs.

"I have been very pleased with PETNET Direct online dose ordering. I appreciate the ease that this software allows; it has simplified much of the dose ordering process."

– Luke Breazeal CNMT, PET, RT(CT), Oregon Imaging Centers

PETNET Direct

Streamline facility operations by integrating daily tasks into a one practice management solution, PETNET Direct. Your facility will transform

care delivery and optimize clinical pathways with quick and easy reporting on a variety of metrics with the following practice management tools:

- **e-Ordering**
- **e-Invoices**
- **e-Reports**
- **e-Dose credit request**

e-Ordering	e-Invoices	e-Reports	e-Dose credit request
Customizable dose ordering templates using facility preferences	HIPAA-compliant access to invoices with patient data	Customizable reports available in multiple formats	Simplified process
Easy-to-use ordering-physician database	Easily reconcile reimbursement data	Track disease-specific referral patterns	Immediate, online access to all requests
Integrated scheduling and dose ordering functions		No-show, no-scan and cancellation monitoring	Full report capabilities
Triple order confirmation		Ability to follow patient treatment strategy—diagnosis, staging, and restaging
