

Siemens Healthineers Strengthens Technology Position in Immunoassay Point-of-Care Testing

- **Minicare BV offers handheld technology to deliver immunoassay testing at the point of care.**
- **Siemens Healthineers aims to transform care delivery and improve patient experience for in vitro diagnostics with innovative technology to advance point-of-care testing.**

Siemens Healthineers announced today the acquisition of Minicare BV. Minicare BV is a privately held company with nearly 15 employees and is based in Eindhoven, Netherlands. Minicare BV's handheld technology offers Siemens Healthineers the capability to miniaturize immunoassay testing for point-of-care applications. The deal closed on July 2, 2019. Financial details of the transaction were not disclosed.

"Next-generation point-of-care testing from Siemens Healthineers will bring healthcare providers the capability to expedite immunoassay test results and enable timelier patient care," said Christoph Pedain, PhD, Head of Point of Care Diagnostics, Siemens Healthineers. "By integrating the analyte detection technology Minicare BV has developed with Siemens Healthineers engineering expertise and global reach, our vision for healthcare providers is that they will be able to deliver quality immunoassay testing in the right setting for their patients at the right time."
