

teamplay Insights – Maximize your insights, optimize your value

Monitor quantities, simplify your reporting, and accelerate your clinical processes

teamplay applications for performance management in radiology help you to make quick and well-informed decisions by offering a clear overview of your performance data. Monitor quantities like imaging throughput, dose levels, utilization of staff, rooms, and your department's resources down to each device and procedure. Simplify your reporting and gain insights into where workflows need adjustments. Link with other teamwork users and their data for comparable benchmarks and an effortless exchange of images and reports.

Healthcare professionals, hospitals, and institutions come together in teamwork's rich cloud-based network. Access both the metrics from your own imaging fleet and from a shared pool of imaging data. As a community, you connect and collaborate in a trusted environment with high data privacy and security standards to improve patient outcomes and quality of care.

Main challenge

How do you find the right balance between optimized resource utilization and the possibility to offer slots for priority and emergency cases?

How would you make decisions on how to reduce wait times for diagnostic imaging appointments, all the while managing patient backlog?

How do you conduct reporting of performance indicators to monitor whether you have achieved your set goals?

Our solution for operational decision making

With **teamplay Insights**, you get broad access to your radiology department data to discover insights you could not have found before. Build highly flexible, personalized, and interactive data visualization boards for both a monitoring view of your radiology department as well as for a deep dive analysis in specific use cases. Create trackers to check and report whether you will reach your set goals. Analyze and better understand numbers of no-shows and requirement patterns for priority cases. Take deep dives into your dose data to help better understand reasons behind dose outliers, and then decide on measure to be taken to remedy said outliers. Or, find out what the busiest times are to schedule enough staff. With this knowledge at hand you can take well-informed decisions to improve resource utilization. Maximize your insights, optimize your value.

What teamwork Insights is doing for you:

- Get broad and convenient access to operations data, easily
- Build your very own metrics and graphs, simply drag and drop
- Track individual targets and KPIs (Key Performance Indicators) with customizable dashboards
- Create tailored communications to management

Customer voice:

*"Teamplay Insights is an indispensable tool for a multi-system multi-site activity. It gives us the opportunity to analyze and better understand the flows related to our activity by evaluating any corrective action. It's hard to remember our life before teamwork arrived, as this tool has become a part of our daily routine."*¹

Michel Paret, Service head MRI, GIE Irmas, France

Our teamwork performance management applications

- **teamplay Dose – Simplify your radiation dose management**
Get easy to use tools to monitor, report, and benchmark radiation dose values for your entire imaging fleet.
- **teamplay Usage – Increase your efficiency and optimize your imaging fleet utilization**
Analyze your imaging fleet utilization and understand how you can increase your productivity.
- **teamplay Protocols – Speed up your protocol management by facilitating remote access**
Identify best-practice scan protocols for your imaging fleet and optimize your radiology workflow with teamwork Protocols.²
- **teamplay Images – Share and discuss images in a secured environment**
Access and share imaging studies with peers to discuss relevant cases in a secured environment.^{3,4}

¹ The statements by Siemens Healthineers' customers described herein are based on results that were achieved in the customer's unique setting. Since there is no "typical" hospital and many variables exist (e.g. hospital size, case mix, level of IT adoption) there can be no guarantee that other customers will achieve the same results.

² teamwork Protocols supports selected Siemens scanners. Please contact your Siemens representative for more details.
