

Advance Plans

Maximize efficiency
in the digital era

Driving standardization and clinical excellence. Managing a complex and connected fleet. Preventing technology obsolescence and unplanned expenditure. Keeping sensitive patient data safe from cyber-attacks. These are some of the challenges that healthcare providers are facing in a market where the pace of technological developments and digitalization is speeding up. Keeping system software and hardware up to date is key for reliable clinical care, constant workflow performance, and dependable data protection. That's why the need for future-proof and efficient medical equipment with a sustainable cybersecurity coverage has never been more present than now.

Advance Plans from Siemens Healthineers are service agreements for medical equipment in the digital era. Comprising a wealth of innovative and intelligent services, they help keep your medical systems cutting-edge, connected, and competitive.

Advance Plans make your equipment future-proof, highly efficient, and cybersecure throughout its entire serviceable life. At the same time, they cover your regulatory, quality, and financial needs.

Choose your digital future now:

- **Be cutting-edge** – deliver precision medicine effectively by leveraging innovation to keep your equipment constantly secure and future-proof
- **Be connected** – get fast support and instant access to insights and know-how through our experts and digital touchpoints
- **Be competitive** – leverage intelligent services to keep your systems efficient and your clinical operations running smoothly

A smart combination of digital and personal support keeps your operations running smoothly and allows us to be right by your side 24/7.

Traditional service

Your digital strategy for constant up-to-date-ness

AdvanceNow

Our long-term update and upgrade service keeps your imaging equipment highly efficient and secure throughout its serviceable life. To let you benefit from advancements in intelligent imaging, system software upgrades are automatically provided as soon as they are available and computing hardware is replaced when required – continuously.

Digital Platforms

Our online touchpoints move our services closer to you – by providing immediate access to service experts, equipment information, and education insights. They thus enable fast action with less interruption of your daily business and open a wealth of intelligent services: from fast remote technical support to virtual training and more.

Planned and Corrective Maintenance

These traditional maintenance and repair services keep your systems up and operations running, while covering your fundamental regulatory, quality, and financial needs.

Actively shape your digital future

Choose between CORE, FIT, and MAX Plans and tailor our great variety of services exactly to your needs:
