

teampay myCare Companion – Remote care management solutions

for COVID-19¹

Top challenges

1 Free up hospital beds

2 Limited hospital staff

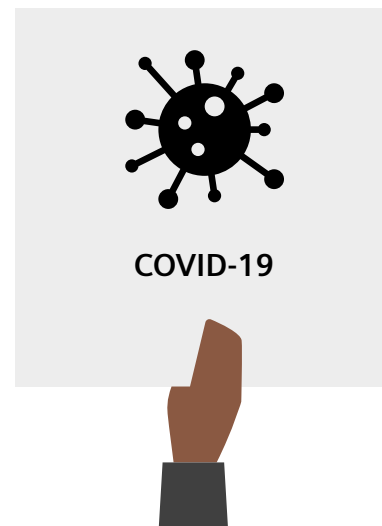

3 Monitor with less resources

Solution

 Connecting patients in quarantine remotely with physicians so that they can track progress of potential COVID-19 symptoms of these patients and act accordingly.

Benefits

Keeps potentially infected persons out of physician offices, ambulatory clinics, hospitals, ER's

Physicians in charge being informed promptly of symptom progress

Clinical staff can also be monitored while remaining integrated in critical care scenarios

Patient

Measures body temperature and SpO₂ levels with 3rd party measuring devices

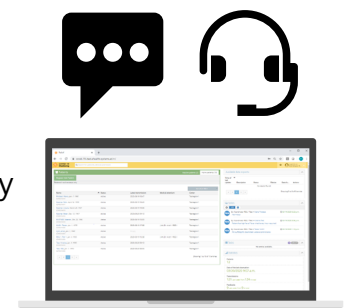

Web-access via smartphone or PC for patient data and questionnaire

Health authority

Dashboard

- Smart overview of enrolled
- All relevant data in one view
 - Progress on temperature curve
 - Questionnaires and chat history
 - Nursing notes and reminder for follow-ups

Solution
Partner

¹ COVID-19 Use case is currently not part of teampay myCare Companion. Developed by AIT Austrian Institute of Technology in cooperation with telbiomed Medizintechnik und IT Service GmbH.
