# FlexForce Tech

Boost your organizational outcomes with our expert radiographers working by your side

With growing and aging populations putting healthcare systems under pressure, demand for full-time employees in imaging departments has almost doubled over the last 15 years<sup>1</sup>. At the same time, there is a global lack of skilled healthcare professionals, such as radiographers<sup>2</sup>. In short, radiology practices and departments have more patients to care for and less personnel to provide that care. How can you bridge this gap?

**FlexForce Tech** is a workforce solution that provides highly skilled radiographers with OEM training and support. This service helps you to reduce your staff shortages while increasing the total number of procedures performed and leading to improved outcomes.

Experience lasting value from our first-class workforce with industry expertise – and boost your productivity with FlexForce Tech:

**Reduce workforce shortages** – benefit from a solution that provides highly skilled and licensed radiographers trained and supported by Siemens Healthineers to address your workforce challenges

**Increase efficiency** – bring in talent with in-depth equipment and application knowledge who can perform quality exams from week one to avoid patient leakage, and reduce both staff burden and ramp-up times

**Improve financial performance** – reduce overtime and onboarding costs while increasing the number of daily exams, leading to a positive financial impact

## FlexForce Tech

Our radiographers work by your side for a few months to several years to solve your workforce challenges.
