

Medicalis Referral Management with Medicalis Clinical Decision Support

One streamlined solution, multiple positive impacts

Do you want to

- Improve communication with external referring physicians?
- Promote best practice and ensure clinically appropriate use of advanced diagnostic imaging?
- Engage your referral community to further enhance care delivery?
- Maximize imaging resource utilization?

We have a solution for you!

We offer one interface for external referring physicians, regardless of how many EMRs or RIS systems you have across your imaging network. The solution streamlines imaging services and ensures the right order, first time with integrated imaging Clinical Decision Support.¹

What is the benefit of the combined Referral Management and Clinical Decision Support solution?

A complete solution to accommodate access at the point of order entry with the target to improve communication with the external referral community, increase efficiency, and encourage best practice. The strong integration capabilities with existing systems creates seamless data flow to minimize overhead, reduce unnecessary imaging exams, and minimize paper orders.

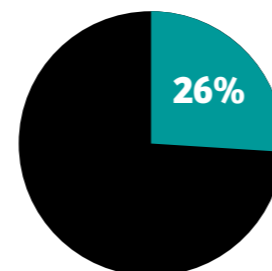

What is Medicalis Referral Management?

A solution that facilitates consistent, timely, and bidirectional communication with your referral base. Enabling a higher value of service to your community by closing the communication loop from initial ordering of imaging exams to results access. Medicalis Referral Management helps to digitalize your referral management operations and streamline your external referrals workflow through key features such as:

- Electronic order entry (CPOE), sub-specialty customization, and dynamic order status updates
- Patient assessment seamlessly integrated with our Medicalis Clinical Decision Support to promote best practice and ensure compliance with local guidelines
- Multisite online scheduling with procedure-specific patient preparation instructions

The consequences

Did you know that 26% of all imaging is ordered incorrectly when placed without evidence-based standards?²

What is Medicalis Clinical Decision Support?

An imaging clinical decision support system that helps evaluate the appropriateness of imaging orders by delivering up-to-date, evidence-based clinical best practice at the point of order entry.³

The Medicalis Clinical Decision Support Mechanism provides a proven, evidence-based targeted approach with possible focus on advanced imaging modalities, indication and clinical priority area for content delivery. The target is to ensure that physicians are only engaged for cases where there is high potential for positive impact in return, increase quality, and minimize potential negative impact on patient care. Key features include:

- Support for multiple Appropriate Use Criteria (AUC) guidelines
- Seamless integration at the point of order entry with minimum interruption
- Measured results through analytics

¹ Medicalis Referral Management and Medicalis Clinical Decision Support are two products and can be offered independently.

³ Medicalis Clinical Decision Support can be offered integrated with Electronic Medical Record systems, Referral CPOEs, or as a standalone cloud-hosted consult portal.

Medicalis Referral Management provides effective centralized scheduling resulting in as low as

call abandonment rate due to scheduling efficiency⁴

“By utilizing Medicalis technology integrated with our enterprise EHR, Weill Cornell Imaging hasn’t just optimized its current safety and operational workflows, it’s also well positioned for further reimbursement, regulatory, and operational requirements.”⁵

Keith Hentel, MD, MS

Executive Vice Chairman, Vice Chairman for Clinical Operations, Associate Professor of Clinical Radiology at Weill Cornell Medicine, Department of Radiology, New York Presbyterian Hospital, USA

⁴ Optimizing Patient Centric Care through Medical Imaging Services – Weill Cornell Medicine Department of Radiology’s Pathway to Thriving in a Changing Healthcare Environment, Frost & Sullivan

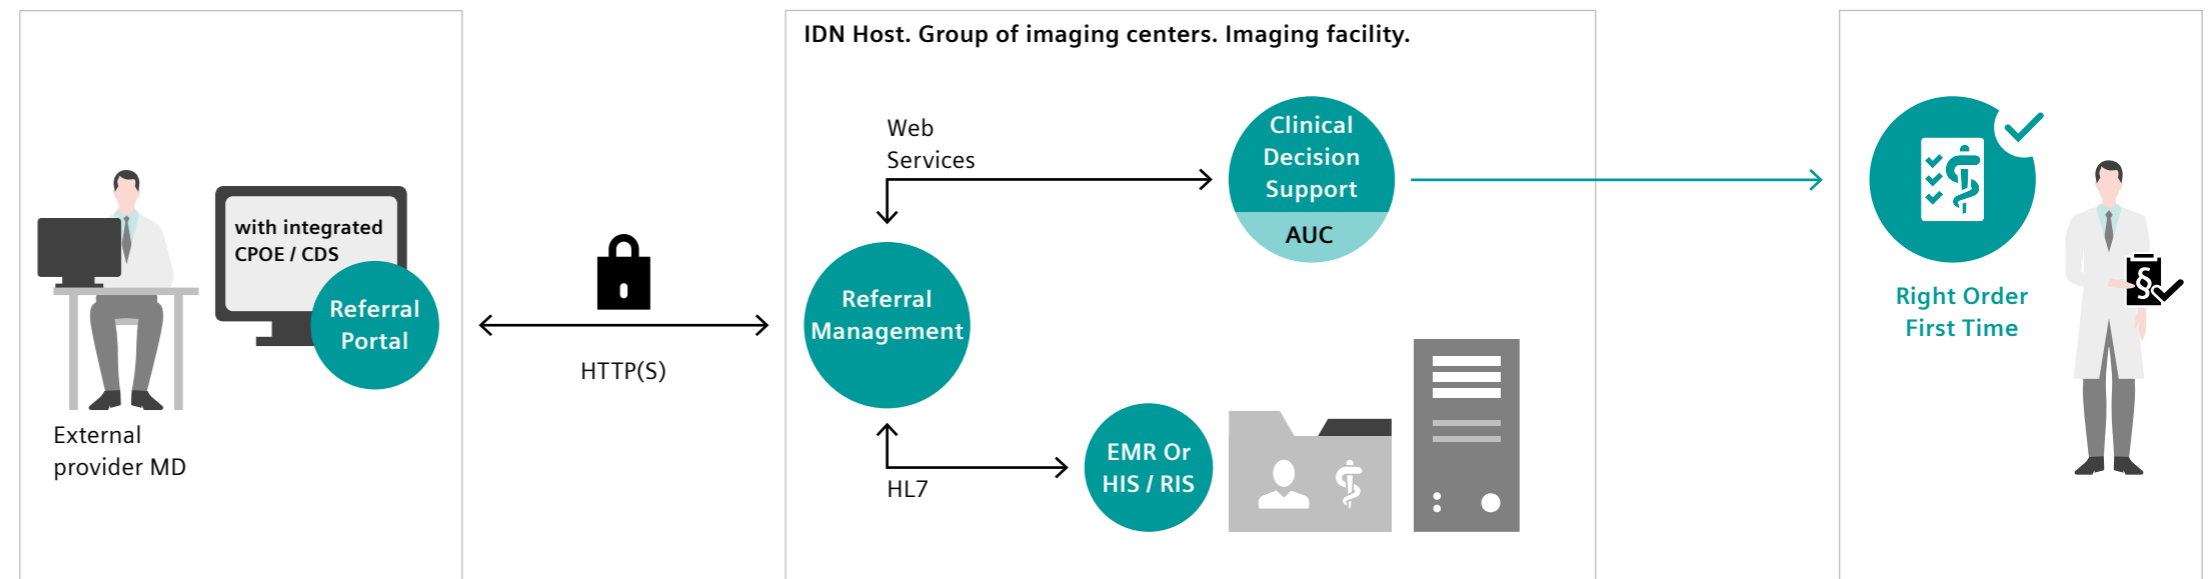

⁵ The statements by customers of Siemens Healthineers described herein are based on results that were achieved in the customer’s unique setting. Since there is no “typical” hospital and many variables exist (e.g., hospital size, case mix, level of IT adoption), there can be no guarantee that other customers will achieve the same results.

Contact us to discuss which of our combined solution options is right for you

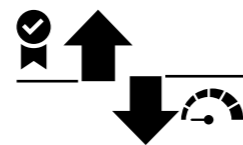

We offer choices to accommodate your needs, and consultation to help you implement the solution that is right for you.

You can choose

- from multiple supported Appropriate Use Criteria imaging guidelines from qualified providers (or we can further discuss your guidelines of choice)
- to offer online scheduling in addition to electronic order management
- to limit CDS implementation based on your choice of priority clinical areas
- to continuously monitor operational efficiency and measure results through combined analytics

Our goal for your institution

Improve quality and reduce wasteful utilization

Reduce communication breakdowns and operational inefficiency

Engage providers, encourage best practice
