# Dimension Vista 500 and 1500 Intelligent Lab Systems

Speed and quality without compromise.

The Dimension Vista® Intelligent Lab Systems provide intelligent analytics in which sample-centric design, unique integration of four technologies including LOCI® advanced chemiluminescence technology, and customer-driven engineering all come together for a more efficient workflow.

- Incorporate Lean principles with a sample-centric design for simplified, consolidated sample processing.
- Uniquely integrate of four technologies to allow simultaneous processing of tests for multiple disease states on a single platform from a single tube.
- Eliminate many manual tasks with user-driven engineering, freeing up technical time to address critical issues throughout the lab.
