# Immersive and Digital Education

Transforming care delivery with personalized learning experiences

Immersive learning takes real situations into a safe environment where the learner can control the outcome.

Using interactive elements, specific skills or techniques can be taught – allowing room for mistakes.

Users can make decisions and understand their effects before applying them to real life.

1 This product is under development and not commercially available. Its future availability cannot be ensured.  
2 Siemens Healthineers is not the legal manufacturer of this product. Any claims made for this product are under the sole responsibility of the legal manufacturer. Additionally, it may not be commercially available in all countries.  
The products/features and/or service offerings (here mentioned) are not commercially available in all countries and/or for all modalities. If the services are not marketed in countries due to regulatory or other reasons, the service offering cannot be guaranteed. Please contact your local Siemens Healthineers organization for further details. For training purpose only. Not for clinical use.

# Smart Enablers

## Smart Remote Services (SRS)<sup>1</sup>

The secure connection to support in digitalizing healthcare – is a fast, secure and powerful data link that connects your medical equipment to our experts, who provide you with proactive and interactive services that support you in your daily routine and bring speed to your running operations.

## Smart Simulator<sup>2</sup>

The virtual connection to a hands-on scanner experience – Uses computing power in the cloud to simulate medical device interfaces from Siemens Healthineers on a personal computer to augment the training experience

<sup>1</sup> Connection to Smart Remote Services (SRS) infrastructure is required. SRS has advanced security measures in place and is compliant with the ISO 27001:2013 Standard for Information Security.  
<sup>2</sup> For training purpose only. Not for clinical use.
