

This is your opportunity to be part of a company with long traditions and innovative refrigeration solutions technology that is shaping tomorrow's commercial refrigeration.

We are looking for an experienced **Project Manager** to ensure high customer satisfaction and quality of our deliverables. In Viessmann, the Project Manager is responsible for all project management aspects of a complex project and all project management competence elements.

Your Main Duties as Project manager are as follows

- ❖ To drive the success for the selected projects across the value chain.
- ❖ To coordinate collaboration between all internal stakeholders, also across-borders.
- ❖ To define and communicate the project objectives, budget, team, schedule and milestones.
- ❖ To maintain the progress and motivate all stakeholders to bring the best out of their know-how.
- ❖ To ensure collaboration with related departments regarding completion of every aspect of assigned projects.
- ❖ To lead and coordinate internal and/or external resources to accomplish tasks and milestones.
- ❖ To understand and implement compliance documentation and regulatory directives.

Main competences and requirements for the job position as Project manager

- ❖ You are able to make key decisions for technical issues related to projects after considering all aspects from cost to quality.
- ❖ You display a strong self-guiding and goal oriented attitude as well as excellent leadership skills.
- ❖ You are focused on quality in project management.
- ❖ You oversee the development and implementation of technical issues through all steps of the process.
- ❖ You possess excellent leadership, communication, sales, and customer service skills.
- ❖ You are able to prioritize workload.
- ❖ You are an energetic and flexible team player.
- ❖ You are fluent in spoken and written Danish & English.
- ❖ You have a degree in engineering with thermodynamics.
- ❖ As an advantage, we consider Project Management certification (IPMA C preferred, corresponding PMI) and understanding of philosophy Lean & Tools.
