
Food freshness and flexibility - Viessmann introduces a new semi-vertical plug-in range for food retail

- **The Tecto SV3 PI semi-vertical cabinet line enables new cabinet placements**
- **Excellent product display design**
- **Sustainable solution with natural refrigerant R290 and energy-efficient features**

Düsseldorf, 16 February 2020 – Most food retail stores have been built on remote refrigeration technology, which is less flexible to change if needed. Some retailers prefer to build stores quickly, with more flexibility and without high investments in technology. On the other hand, they expect to have similar product display capacity and options to typical remote technology cabinets. At EuroShop 2020 trade show, Viessmann Refrigeration Solutions presents new plug-in semi-vertical cabinets to meet these requirements and those for the high energy efficiency and excellent quality.

Tecto SV3 PI a sustainable choice

The Tecto SV3 PI cabinet is excellent when it comes to combining temperature performance and energy efficiency. The use of **natural refrigerant R290** helps in the fight against global warming and meets the F-gas regulation requirements. With **energy-saving fans** and special Viessmann **LED lighting**, Tecto SV3 PI is a resource-saving and sustainable cabinet. A special energy-efficient condensing unit with a brine heat exchanger and defrost water evaporation without electrical heaters are additional features, which make this cabinet a true ecological friend.

Premium mid-floor design shows food produce at its best

The footprint of the Tecto SV3 is the same as typical plug-in island gondolas in food retail stores. Within this space, food retailers can now display food products in mid-floor presentation. Compared to the chiller islands, the cabinet provides **higher product display volume** with excellent, **eye-level facing** of the products. The Tecto SV3 allows easy loading and removal of the goods thanks to the ergonomic design and height of the bottom display shelf.

Cabinet design features clear visibility for the shelves from all angles. **Large glass surfaces** together with excellent product lighting make it easier to find and navigate through products.

Food safety and hygiene first

The Tecto SV3 PI has been developed to meet the excellent and stable temperature requirements of even the most demanding chilled food like minced meat. The removable return air grille and bottom display deck allow **easy cleaning** of this newly developed cabinet. The Tecto SV3 PI is also equipped with separate drains for defrost and cleaning water.

The Tecto SV3 PI cabinet line is being introduced at the EuroShop exhibition in February 2020 and will be available for customer deliveries.

About Viessmann:

The Viessmann Group is one of the leading international manufacturers of heating, industrial, and refrigeration solutions. This family enterprise was founded in 1917, has 12,000 employees, and the group's turnover amounts to €2.5 billion euros.

Viessmann Refrigeration Solutions is one of the leading European manufacturers of commercial refrigeration and clean room solutions, renowned for their energy efficiency, sustainability, ease of use and maintenance. Viessmann's refrigeration product and service portfolio includes refrigerated cabinets, refrigeration systems, cold and clean room solutions, accessories and related services. Viessmann refrigeration solutions employs nearly 1,500 refrigeration professionals in Europe. The products are manufactured at Viessmann factories in Germany and Finland and are represented by local sales offices in 18 countries, backed up by an extensive network of partner companies.
