Thieme Medical E-Journals

Thieme Medical E-Journals are especially designed for the research and information needs of academic institutions, medical schools, hospitals, research facilities and the healthcare industry.

Our E-Journals interface is a sophisticated web service available for PCs, tablets and smartphones presenting tables of contents, abstracts and full text in high quality interactive format.

Users will be kept abreast of cutting edge developments with fast and efficient online delivery and powerful searching tools.

The screenshot shows the Thieme Endoscopy website interface. Callouts point to the following features:

- eFirst**: Points to the 'eFirst' tab in the article navigation bar.
- Search journal contents**: Points to the search bar at the top of the page.
- Create a personal account**: Points to the 'Not Logged In' and 'Login' links.
- Advanced search options**: Points to the search dropdown menu.
- View full text in HTML or PDF format**: Points to the 'Full Text' button and the 'HTML' and 'PDF (1658 kb)' options.
- Video available**: Points to the video icon in the article navigation bar.
- RSS and Social Bookmarking**: Points to the RSS, email, and social media icons.

The main article displayed is 'A subepithelial lesion algorithm for endoscopic (SAFE) resection in the upper gastrointestinal tract' by Gupta, Sunil et al. The article includes a flowchart for the algorithm and a table of outcomes.

Prospective observational study (n = 106)	Esophagus (n = 41)		Stomach (cardia) (n = 6)		Stomach (noncardia) (n = 59)	
	ESD (n = 22)	STER (n = 19)	STER (n = 6)	ESD (n = 47)	e-EFTR (n = 12)	
Technical success	95%	100%	100%	89%	100%	
En bloc resection	100%	95%	100%	95%	100%	
R0 excision	81%	42%	33%	50%	75%	
Median LOS	1 day	1 day	2 days	1 day	3 days	

A personal account can be created to benefit from a multitude of services, including eFirst, SDI-Alerts and RSS feeds to inform users of important results in their fields of interest. Searches within Thieme E-Journals and access to the tables of contents and abstracts are provided free of charge.

Selected top titles from the Thieme E-Journals platform

Thieme is a trusted publisher of high-quality scientific journals working with renowned editorial boards from around the world. Our professional peer review and editorial services ensure fast publication of the highest standard including author accepted manuscripts and eFirst.

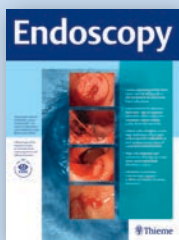

The **American Journal of Perinatology** is an international, peer-reviewed, and indexed journal publishing original research and topical reviews in neonatal and maternal-fetal medicine.

Facial Plastic Surgery is an indexed review journal that publishes topic-specific issues covering areas of aesthetic and reconstructive plastic surgery as it relates to the head, neck, and face.

[MedOne Plastic Surgery](#)

Endoscopy is the premier journal on international developments in gastrointestinal endoscopy. From top quality review articles and original contributions to engaging eVideos, fast, in-depth coverage of the most important national and international meetings and valuable surveys of diagnostic and therapeutic advances.

"Endoscopy is a leading journal in the field of GI endoscopy by publishing original papers on new developments in the field of diagnostic and therapeutic endoscopy. The central focus of Endoscopy is to present our readers practical solutions to current and future endoscopic dilemmas that are based on evidence-based medicine but also on opinions of experts in the field. In addition, our journal features special articles addressing complicated procedures and how to perform them. Of course, we are proud to publish state-of-the-art guidelines which are worldwide implemented." Dr. Peter Siersema

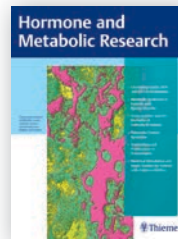

European Journal of Pediatric Surgery updates you on vital developments in pediatric surgery. Written by surgeons, physicians, anesthesiologists, radiologists, and others involved in the surgical care of neonates, infants, and children, EJPS is an indispensable resource for all specialists.

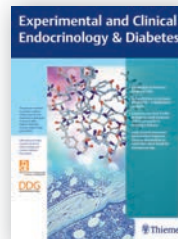

The **Journal of Reconstructive Microsurgery** is an international, peer-reviewed, and indexed journal dealing with original research and topical reviews for the practising microsurgeon.

[MedOne Plastic Surgery](#)

Hormone and Metabolic Research covers the fields of endocrinology and metabolism from both a clinical and basic science point of view. With a preference for experimental over observational studies, this journal disseminates new and reliable experimental data to researchers, scientists and doctors worldwide.

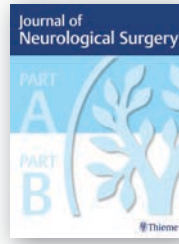

Experimental and Clinical Endocrinology & Diabetes features outstanding articles covering all fields of endocrinology and diabetology. Case reports, original contributions and short communications appear in each issue along with reviews addressing current topics.

Planta Medica is one of the leading international journals in the research area of natural products of any origin – from characterized multi-compound mixtures to defined natural products. Planta Medica accepts original research papers and reviews with a strong emphasis on originality and scientific quality.

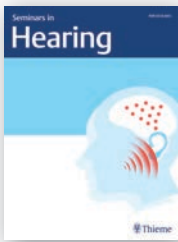

Neuropediatrics is the worldwide journal of choice for key insights into today's practice of pediatric. Original articles, case reports and panel discussions are the distinctive features of a journal that always keeps abreast of current developments and trends – the reason it has developed into an internationally recognized forum for specialists throughout the world.

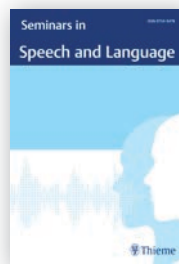

The **Journal of Neurological Surgery (JNLS)** is a major monthly publication from the world's leading publisher in neurosurgery. The renowned expertise of Central European Neurosurgery (formerly Zentralblatt für Neurochirurgie), Minimally Invasive Neurosurgery and Skull Base have been combined and expanded into one journal.

MedOne Neurosurgery

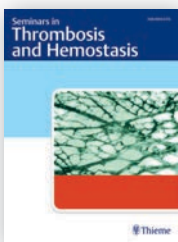

Seminars in Hearing is an indexed review journal that publishes topic-specific issues in the field of audiology including areas such as hearing loss, auditory disorders and psychoacoustics.

MedOne ComSci

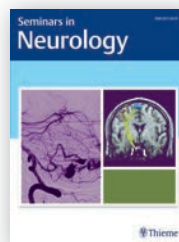

Seminars in Speech and Language is a topic-specific, indexed review journal covering the entire spectrum of speech language pathology as it relates to both children and adults.

MedOne ComSci

Seminars in Thrombosis and Hemostasis is a topic-specific, indexed review journal that focuses on all issues relating to hemostatic and thrombotic disorders.

Seminars in Neurology is an indexed review journal that publishes topic-specific issues devoted to a range of key themes in contemporary neurology.

Seminars in Liver Disease is an indexed review journal that publishes topic specific issues related hepatology and gastroenterology. It is the premiere review journal in the field, and provides in-depth coverage on a range of topics such as cirrhosis, transplantation, vascular and coagulation disorders, and pediatric liver diseases.

“Over the past three decades Seminars has established itself as a premier source of outstanding reviews of the important issues in hepatology, with a unique format that combines important new clinical information with relevant basic science background material.”

Dr. Eugene R. Schiff, University of Miami School of Medicine

Journal of Wrist Surgery covers a range of issues relating to the orthopedic techniques of wrist and small joint arthroscopy, arthroplasty, and reconstructive surgery of the wrist and carpus. In addition to original peer-review articles, this quarterly periodical provides details on emerging surgical techniques, as well as case reports, reviews, and special focus sections.

International Journal of Sports Medicine publishes original research and review articles related to the field of sports medicine and exercise science. The journals has fast turn-around times employing select crowd review to speed up publication.
