Thieme Innovation

Why publish Open Access?

Thieme provides authors with Open Access publishing supported by expert peer review, editorial services, rapid online publication, dedicated support, and broad dissemination.

INCREASE VISIBILITY, READERSHIP AND IMPACT

There are no restrictions viewing our Open Access content which allows higher visibility, discoverability, citations and usage of publications. Open Access articles are available to everyone globally.

COMPLY WITH OPEN ACCESS REQUIREMENTS

Some funding organizations require that the recipients of their grants publish the resulting research Open Access. Thieme offers creative commons licenses that comply with the stipulations of all funders and help authors fulfill their mandate.

INTEGRITY IS OUR MISSION

Talking of editorial excellence – Thieme's key focus is on providing high standards of editorial, author and production services. Our articles undergo stringent, high-quality peer review, and we are committed to ensure to increase the visibility of papers. **Thieme never compromises on quality!**

AUTHORS RETAIN COPYRIGHT AND CAN ACCELERATE RE-USE

Publishing Open Access also means that authors can share their research with peers around the world – Thieme Open Access articles are available freely to read, download, and share. Our Open Access articles are published online under a creative commons license. Articles can be shared, copied, and redistributed in any medium or format under the condition that the author is given appropriate credit.

OPEN ACCESS FUNDING AGREEMENTS AND WAIVERS

Our agreements with a range of institutions may allow authors to publish Open Access for free or at a discount. Additionally, authors based in countries on the Research4Life list are eligible to receive waivers to publish in our Gold Open Access journals.

Thieme Integrity

Partnerships for Open Access Excellence

Open Access agreements with Thieme accelerate research output to Open Access whilst allowing broader accessibility to Thieme's journals. They pave the way to a sustainable future for all stakeholders in the dissemination of scientific research.

AN OA AGREEMENT WITH THIEME PROVIDES THE FOLLOWING INSTITUTIONAL BENEFITS:

✓ **Breaking down barriers to access research**

An OA license allows authors to retain copyright of their work and permits others to distribute the work freely, in exchange promoting wider circulation of an institution's research.

✓ **Reduced OA publishing costs**

Libraries can control costs to allow budget predictability through an OA agreement with Thieme.

✓ **Simplified administration**

Libraries can be assured of a streamlined process and workflow associated with managing OA to deliver increased efficiencies.

✓ **Value of the library**

The library's role is further enhanced and remains the focal point of their campus community by providing access to OA publishing.

✓ **Meeting institutional OA goal(s)**

Signing an OA agreement can enable institutions to reach their specific OA goals faster.

✓ **Make an impact**

Transforming research output to OA increases the discoverability, visibility, and impact of an institution's research.

✓ **Equitable OA publishing**

Regardless of grant or departmental funding, researchers can publish OA and in return strengthen the research culture across the institution.

✓ **Track and monitor OA compliance**

Use our secure online dashboard to monitor author requests and track institutional research output to ensure compliance with both institutional policies and funder policies.

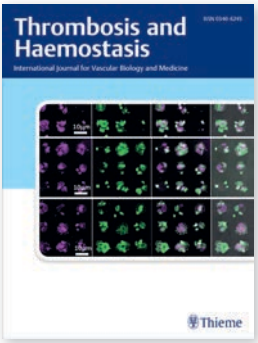

Thieme Sustainability

Gold OA and Hybrid

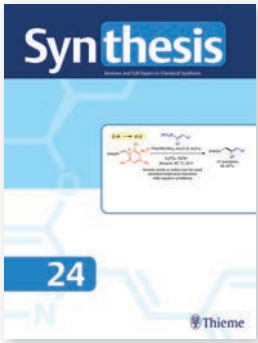

Thieme's journal portfolio includes both Gold and Hybrid OA journals in medicine and chemistry. Our journals have solid impact factors and are listed in major indexing and abstracting services.
