EDITORS

T. Heather Herdman, PhD, RN, FNI, FAAN, is Chief Executive Officer of NANDA-I and past President (2006-2008), Green Bay, Wisconsin, USA

Shigemi Kamitsuru, PhD, RN, FNI, is past President of NANDA-I (2016-2020), and owner of Kango Laboratory, Tokyo, Japan

Camila Takáo Lopes, PhD, RN, FNI, is Director of the Diagnosis Development Committee of NANDA-I, and Adjunct Professor of Nursing Fundamentals and Masters and Doctoral Advisor, Nursing Graduate Program, Paulista School of Nursing, Federal University of São Paulo (Escola Paulista de Enfermagem, Universidade Federal de São Paulo), Brazil

DESCRIPTION

The quintessential guide to nursing diagnoses from NANDA-I experts in new updated edition

Fully updated and revised by editors T. Heather Herdman, Shigemi Kamitsuru, and Camila Takáo Lopes, *NANDA International Nursing Diagnoses: Definitions and Classification, 2024-2026, 13th Edition* is the definitive guide to nursing diagnoses, as reviewed and approved by the NANDA International (NANDA-I) Diagnosis Development Committee (DDC). In this new edition of a seminal text, the editors have provided a more in-depth discussion on diagnosis and its linkage to assessment, using Kamitsuru's Tripartite Model of Nursing Practice to differentiate between interdependent interventions based on medical and organizational standards of care, and autonomous nursing interventions based on nursing standards of care. Functional Health Patterns are used as an assessment framework to guide nurses in collecting relevant data to drive accuracy in nursing diagnosis. Ontology, classification and taxonomy are described, and the axial structure of our diagnoses – which has seen significant revision – is explained in detail. An overview on all changes and revisions in the classification is provided, along with updated research priorities and future foci for the Diagnosis Development Committee and the NANDA-I Association.

Additional Key Updates

- 56 new nursing diagnoses and 123 revised diagnoses
- Revised diagnostic indicators to decrease ambiguity and improve clarity
- Updated Axes with consistent assignment of axis values to each diagnosis
- Assignment of US National Library of Medicine, Medical Subject Headings (MeSH®) terms to provide standardized definitions and ensure consistent understanding
- Revised level of evidence criteria to ensure future diagnoses remain at an appropriate level of evidence to represent the current strength of nursing knowledge
- Web-based resources include reference lists for all new and revised diagnoses

Rigorously updated and revised, the new edition of this acclaimed text is a must-have resource for all nursing students, professional nurses, nurse educators, nurse informaticists, nurse researchers, and nurse administrators.

This print book includes complimentary access to a digital copy on <https://medone.thieme.com>.

CONTENTS**Part 1 The NANDA International Classification: Assessment and Diagnosis**

- 1 Nursing Diagnosis Basics
- 2 From Assessment to Diagnosis

Part 2 The NANDA International Classification: Structure and Diagnoses

- 3 The NANDA International Classification of Nursing Diagnoses
- 4 The Axial Structure of NANDA International
- 5 Ordering Principles for Diagnoses within the Taxonomic Structure

Part 3 The NANDA International Classification: What's New and Future Recommendations

- 6 What's New in the NANDA-I 2024–2026th Edition
- 7 Future Improvement of the NANDA-I Classification
- 8 Revised Level of Evidence Criteria for Diagnosis Submission

Part 4 The NANDA International Nursing Diagnoses

Domain 1. Health promotion

- Class 1. Health awareness*
- Class 2. Health management*

Domain 2. Nutrition

- Class 1. Ingestion*
- Class 2. Digestion*
- Class 3. Absorption*
- Class 4. Metabolism*
- Class 5. Hydration*

Domain 3. Elimination and exchange

- Class 1. Urinary function*
- Class 2. Gastrointestinal function*
- Class 3. Integumentary function*
- Class 4. Respiratory function*

Domain 4. Activity / rest

- Class 1. Sleep / rest*
- Class 2. Activity / exercise*
- Class 3. Energy balance*
- Class 4. Cardiovascular / pulmonary responses*
- Class 5. Self-care*

Domain 5. Perception / cognition

- Class 1. Attention*
- Class 2. Orientation*
- Class 3. Sensation / perception*
- Class 4. Cognition*
- Class 5. Communication*

Domain 6. Self-perception

- Class 1. Self-concept*
- Class 2. Self-esteem*
- Class 3. Body image*

Domain 7. Role relationship

- Class 1. Caregiving roles*
- Class 2. Family relationships*
- Class 3. Role performance*

Domain 8. Sexuality

- Class 1. Sexual identity*
 - Class 2. Sexual function*
-

Class 3. Reproduction
Domain 9. Coping / stress tolerance
Class 1. Post-trauma responses
Class 2. Coping responses
Class 3. Neurobehavioral responses
Domain 10. Life principles
Class 1. Values
Class 2. Beliefs
Class 3. Value / belief / action congruence
Domain 11. Safety / protection
Class 1. Infection
Class 2. Physical injury
Class 3. Violence
Class 4. Environmental hazards
Class 5. Defensive processes
Class 6. Thermoregulation
Domain 12. Comfort
Class 1. Physical comfort
Class 2. Environmental comfort
Class 3. Social comfort
Class 4. Psychological comfort
Domain 13. Growth / development
Class 1. Growth
Class 2. Development

TITLE	Neck Rejuvenation Surgical and Nonsurgical Techniques 1st Edition
PRICE	\$239.99
ISBN	9781626239630
PUBLICATION DATE	May 2024
FORMAT	Hardcover · 289 Illustrations · 208 Pages · 7 X 10 IN
MEDIA CONTENT	Complementary MedOne eBook and Videos
SPECIALTY	Plastic Surgery, Facial Plastic Surgery
LEVEL	Plastic surgeons, Facial plastic surgeons

EDITORS

Samuel J. Lin, MD, MBA, FACS, is Program Director, BIDMC/HMS Plastic Surgery Residency Training Programs; Co-Director, Harvard Aesthetic and Reconstructive Fellowship at BIDMC; and Associate Professor of Surgery, Divisions of Plastic Surgery and Otolaryngology, Beth Israel Deaconess Medical Center, Harvard Medical School, Boston, Massachusetts, USA.

Sumner A. Slavin, MD, is a Plastic Surgeon, Chestnut Hill Plastic Aesthetic Surgery Associates, Chestnut Hill; Co-Director, Harvard Aesthetic and Reconstructive Fellowship at BIDMC and Associate Clinical Professor of Surgery, Beth Israel Deaconess Medical Center, Harvard Medical School, Boston, Massachusetts, USA.

DESCRIPTION

A comprehensive guide to neck rejuvenation techniques from multidisciplinary experts

A lifetime of facial expression, elastosis, gravitational forces, and tissue atrophy have a significant impact on the appearance of the neck. As such, neck rejuvenation is one of the most commonly performed aesthetic surgical procedures in the world, with more than 160,000 performed in the U.S. alone in 2020. *Neck Rejuvenation: Surgical and Nonsurgical Techniques* edited by Samuel J. Lin and Sumner A. Slavin reflects many decades of surgical and patient management experience, with contributions from distinguished surgeons across three specialties and many countries.

Successful rejuvenation of the neck and its supporting structures requires in-depth anatomical knowledge, solid comprehension of the aesthetic principles of the neck, mastery of surgical and nonsurgical approaches, and an understanding of patient goals. The book starts with a chapter summarizing major surgically relevant anatomical structures pertinent to rejuvenation of the neck and its supporting tissues. Throughout the subsequent 14 chapters, internationally renowned specialists present a full spectrum of patient-targeted treatments focused on restoring a youthful neck appearance.

Key Highlights

- Cutting-edge surgical procedures utilized by leaders in plastic surgery, facial plastic surgery, and dermatology to improve neck contour and skin quality
- Nonsurgical solutions tailored to address each patient's unique issues, including cosmeceuticals, lasers and energy-based devices, neuromodulators, dermal fillers, deoxycholic acid, and cryolipolysis
- Complication prevention and management strategies for hematoma, skin necrosis, infection, nerve injury, dystonia, and scars
- Advanced treatments for neck rejuvenation demonstrated in 13 intraoperative videos

This unique resource provides seasoned and trainee aesthetic surgeons with the foundation to personalize surgical and nonsurgical approaches, thereby enhancing the ability to deliver optimal results while minimizing complications.

This print book includes complimentary access to a digital copy on <https://medone.thieme.com>.

CONTENTS

1. Neck Anatomy
 2. Neck Rejuvenation: Evaluation and Management
 3. Management of the Aging Neck
 4. The Use of Platysma Window for Neck Contouring
 5. Triple Suture for Neck Contouring
 6. Surgical Approach to Neck Rejuvenation
 7. Deep Plane Neck Lift Concepts and Technique
 8. Lateral Skin-Platysma Displacement Technique
 9. Surgical Techniques for Treatment of the Aging Neck
 10. Neck Lift after Massive Weight Loss
 11. The Use of Radiofrequency for Facial Rejuvenation
 12. Neck Lift and Fat Grafting to the Neck
 13. Neck Rejuvenation: Noninvasive Techniques
 14. Revisional and Secondary Neck Lifts
 15. Neck Rejuvenation: Complications

TITLE	Spinoplastic Reconstruction 1st Edition
PRICE	\$229.99
ISBN	9781684205011
PUBLICATION DATE	May 2024
FORMAT	Hardcover · 227 Illustrations · 338 Pages · 8.5 X 11 IN
MEDIA CONTENT	Complementary MedOne eBook and Videos
SPECIALTY	Plastic Surgery, Neurosurgery, Orthopedics
LEVEL	Plastic, spine, and reconstructive surgeons; Some general and head & neck surgeons who perform surgical exposures for plastic, orthopedic, and neurosurgery.

EDITORS

Alexander E. Ropper, MD, is Associate Professor of Neurosurgery and Director, Spinal Neurosurgery, Baylor College of Medicine; and Director of Spine Surgery, Baylor St. Luke's Medical Center, Houston, Texas, USA.

Sebastian J. Winocour, MD, FACS, is Associate Chief, Division of Plastic Surgery, Baylor College of Medicine; and Section Chief, Plastic Surgery, Baylor St. Luke's Medical Center, Houston, Texas, USA.

Michael A. Bohl, MD, is Associate Director of Neurosurgery Residency and Spine Vice Chief of Operations, Carolina Neurosurgery and Spine Associates, Charlotte, North Carolina, USA.

Edward M. Reece, MD, MBA, FACS, FAAP, is Chair, Division of Plastic Surgery, Mayo Clinic Phoenix, Phoenix, Arizona, USA.

DESCRIPTION

The essential multidisciplinary spine reference on optimizing complex bony and soft tissue reconstruction

Lessons learned from soft tissue reconstruction, wound healing, and infection prevention in plastic surgery and bony arthrodesis strategies and spinal alignment in orthopaedic surgery and neurosurgery have merged to create a new field of surgery. *Spinoplastic Reconstruction*, edited by Alexander E. Ropper, Sebastian J. Winocour, Michael A. Bohl, and Edward M. Reece provides in-depth discussion of multidisciplinary techniques and complication management in complex bony and soft tissue reconstruction, with the goal of improved outcomes for spine surgery patients.

This textbook encompasses the nomenclature, indications, evidence-based techniques, outcomes, and alternatives that laid the groundwork for spinoplastic surgery. Organized into nine sections and 42 chapters, the book begins by delineating the historical and future relevance of multidisciplinary surgery and advent of spinoplastic surgery to ease the growing global disease burden of spine disease. The second section discusses applied anatomy, biomechanics, and bony spinal stability. Sections three to nine provide detailed discussion and pearls on bone healing, bone adjuncts, perioperative management, surgical spine exposures, vascularized autologous bone grafts and flaps, soft tissue spinal reconstruction, and complication management.

Key Features

- Contributions from an impressive group of multidisciplinary spinoplastic surgery founders and innovators exemplifies the ethos of this emerging field
- Traditional and novel approaches for managing common challenges in spine surgery, including pseudoarthrosis and wound infection

- High-quality operative photos, illustrations, and 12 videos provide visual understanding of spinal anatomy and techniques

This unique resource provides spine surgeons with a better understanding of the tenets of soft tissue reconstruction and plastic surgeons with a clearer understanding of the challenges faced in complex spine surgery, thereby improving collaborative patient management.

This print book includes complimentary access to a digital copy on <https://medone.thieme.com>.

CONTENTS

Section I: Introduction

1. History of Multidisciplinary Spine Surgery: Spinoplastics
2. The Future of Multidisciplinary Surgery
3. The Advent of Spinoplastic Surgery: Easing the Growing Global Burden of Spine Disease

Section II: Anatomy and Biomechanics for the Spinoplastic Surgeon

4. Applied Anatomy of the Cervical Spine
5. Applied Anatomy of the Thoracic and Lumbar Spine
6. Applied Anatomy of the Sacral Spine
7. Biomechanics and Bony Spinal Stability

Section III: Bone Healing

8. Bone Modeling and Remodeling
9. Biology and Anatomy of Spinal Fusion
10. Patient Considerations in Bone Healing
11. Bone Grafts versus Flaps: How to Evaluate the Spinal Fusion Bed to Determine Which Is Best for Your Patient

Section IV: Bone Adjuncts

12. Bone Void Fillers: Allograft
13. Bone Void Fillers: Autograft and Harvest Techniques
14. Biologics in Spine Fusion

Section V: Perioperative Management of the Spinoplastic Patient

15. Preoperative Optimization of the Spinoplastic Patient
16. Postoperative Management of the Spinoplastic Patient
17. Perioperative Management of the Pediatric Spine Patient

Section VI: Surgical Spine Exposures

18. Exposures to the Cervical Spine: Anterior and Posterior
19. Exposures to the Thoracic Spine: Lateral and Posterior
20. Exposure to the Lumbar and Sacral Spine
21. Exposures of the Previously Operated Spine

Section VII: Vascularized Autologous Bone Grafts and Flaps

22. The History of Pedicled Myo-Osseous Flaps in Spinal Reconstruction
23. Vascularized Rib Bone Flap: Indications, Techniques, and Outcomes
24. The Free Fibula Flap for Reconstruction of the Spine and Pelvis
25. Nomenclature of Vascularized Bone Grafts
26. Vascularized Occipital Bone Grafting: Indications, Techniques, Clinical Outcomes, and Alternatives
27. Vascularized Clavicle Graft for Anterior Cervical Arthrodesis
28. Vascularized Scapular Bone Grafting: Indications, Techniques, Clinical Outcomes, and Alternatives
29. Vascularized Posterior Iliac Crest Bone Grafting: Indications, Techniques, Clinical Outcomes, and Alternatives

Section VIII: Soft Tissue Spinal Reconstruction

30. Principles and Techniques to Wound Closure
 31. Biologics and Adjuncts to Wound Healing
 32. Soft Tissue Flap Coverage in the Cervical Spine
 33. Soft Tissue Flap Coverage in the Thoracic Spine
 34. Soft Tissue Flap Coverage in the Lumbosacral Spine
 35. Free Flap Soft Tissue Coverage of the Spine and Pelvis
-

36. Soft Tissue Reconstruction in the Pediatric Patient

Section IV: Complications in Spine Surgery and Their Management

37. Management of Soft Tissue Complications

38. Failure in Cervical Spinal Fusion and Management

39. Failure in Thoracic Spinal Fusions and Management

40. Failure in Lumbar Spine Fusion and Management

41. Management of Infection in the Instrumented Spine

42. Management of Pharyngoesophageal Complications in Spine Surgery

TITLE	Spinal Deformities The Comprehensive Text 2nd Edition
PRICE	\$299.99
ISBN	9781626233720 (Previous Edition: 9781588900890, 2003)
PUBLICATION DATE	June 2024
FORMAT	Hardcover · 1068 Illustrations · 878 Pages · 8.5 X 11 IN
MEDIA CONTENT	Complementary MedOne eBook and Videos

EDITORS

Christopher J. DeWald, MD, is Associate Professor, Departments of Orthopedic Surgery and Neurosurgery; Director, Section of Spinal Deformity, Department of Orthopedic Surgery, Rush University Medical Center, Chicago, Illinois, USA. Active member of the SRS since 1996.

Ronald L. DeWald, MD, is Professor Emeritus, Department of Orthopedic Surgery, Rush University Medical Center, Chicago, Illinois, USA. Founding member of the SRS.

DESCRIPTION

The definitive authoritative textbook on spinal deformities from the Scoliosis Research Society

Spinal Deformities: The Comprehensive Text, Second Edition, edited by renowned spinal deformity surgeons Christopher J. DeWald and his father Ronald L. DeWald, is a long-awaited, authoritative, one-stop resource that covers the breadth and depth of this specialized field. The first edition textbook edited by Ronald L. DeWald attempted to help formulate a Scoliosis Research Society (SRS) core curriculum for spinal deformity to meet the educational needs of both aspiring and seasoned spine deformity surgeons. This second edition edited by father and son expands and reorganizes the core curriculum concept. Since the publication of the first edition in 2003, significant advancements have been made in this field. This book reflects greater understanding of the mechanics of correction, new implants and techniques that improve three-dimensional correction, emergence of innovative growing constructs for early-onset scoliosis, and introduction of minimally invasive and nonfusion approaches.

The textbook features 81 chapters organized into six comprehensive sections: Spinal Anatomy and Evaluation, Spinal Pathologies, Pediatric and Adolescent Spinal Deformity, Adult Spinal Deformity, Spondylolisthesis, and Surgical Considerations and Complications. From perioperative management to intraoperative neuromonitoring techniques, the authors share strategies to enhance patient safety and optimize surgical outcomes. Greatly expanded content covers anatomy, etiologies, pediatric and adult deformities, surgical and nonsurgical treatments, and potential pitfalls.

Key Features

- Sponsored by the SRS, with 100% of contributions from members, including senior surgeons
- Step-by-step instructions on diagnosis, surgical planning, operating room setup, intraoperative techniques, and management of complex complications
- Thirty-six videos covering major techniques enhance understanding of surgical procedures and facilitate acquisition of practical skills

This comprehensive reference and practical guide is essential reading for all spine deformity surgeons, from residents and fellows to more advanced practitioners.

This print book includes complimentary access to a digital copy on <https://medone.thieme.com>.

CONTENTS**Section I. Spinal Anatomy and Evaluation***Section I-A: Spinal Structure*

- 1A: Surgical Anatomy of the Cervical Spine
- 1B: Surgical Anatomy of the Thoracic Spine
- 2A: Surgical Anatomy of the Lumbar Spine
- 2B: Surgical Anatomy of the Sacrum and Pelvis
- 3: Neuroanatomy of the Spine
- 4: Embryology and Maturation of the Spine

Section I-B: Spinal Mechanics and Radiographic Measurements

- 5: Biomechanics of the Spine
- 6: Mechanics of Spinal Balance
- 7: Radiographic Measurements in Spinal Deformity
- 8: Spino-Pelvic Parameters

Section I-C: Clinical and Radiographic Evaluation of Spinal Deformities

- 9: Evaluation of the Patient with Congenital Spine Deformity
- 10: Evaluation of the Pediatric and Adolescent Spinal Patient
- 11: Evaluation of Neuromuscular and Syndromic Spinal Deformity Patients
- 12: Evaluation of the Adult Spinal Deformity Patient

Section II. Spinal Pathologies*Section II-A: Bony Pathologies*

- 13: Degenerative Disk Disease
- 14: Spinal Inflammatory Arthritides
- 15: Spinal Neuroarthropathy (Charcot's Spine)
- 16: Pyogenic Vertebral Infection
- 17: Management of Metastatic Disease to the Spine

Section II-B: Neuropathology

- 18: Spinal Trauma and Neurological Injury
- 19: Anterior Horn Cell Disease: Poliomyelitis, Spinal Muscular Atrophy, and Acute Transverse Myelitis
- 20: Congenital and Developmental Spinal Cord Abnormalities: Syringomyelia, Tethered Cord, Diastematomyelia, and Diplomyelia
- 21: Spinal Dysraphisms
- 22: The Spine in Friedrich's Ataxia, Charcot–Marie–Tooth Disease, and Familial Dysautonomia
- 23: Cerebral Palsy and Muscular Dystrophies

Section III. Pediatric and Adolescent Spinal Deformity*Section III-A: Pediatric and Adolescent Spinal Deformities*

- 24: Congenital Scoliosis and Kyphosis
- 25: Idiopathic Scoliosis: Prevalence and Natural History
- 26: Genetics of Adolescent Idiopathic Scoliosis
- 27: Neuromuscular Scoliosis
- 28: Scheuermann's Kyphosis
- 29: Neurofibromatosis in Spinal Deformity
- 30: Spinal Deformity in Syndromic Spinal Diseases
- 31: Infectious and Inflammatory Disorders
- 32: Primary Spine Neoplasms
- 33: Pediatric Spinal Trauma

Section III-B: Non-Operative Treatment for Pediatric and Adolescent Spinal Deformities

- 34: Casting in Infantile Idiopathic Scoliosis
- 35: Bracing and Exercises for Scoliosis

Section III-C: Surgical Treatment for Pediatric and Adolescent Spinal Deformities

- 36: Basic Principles of Spinal Deformity Correction
 - 37: Early Onset Scoliosis
 - 38: Vertical Expandable Prosthetic Titanium Rib
 - 39: Adolescent Idiopathic Scoliosis Surgical Correction
 - 40: Surgical Techniques for the Stiff Deformity
 - 41: Anterior Scoliosis Surgery for Adolescent Idiopathic Scoliosis
-

- 42: Rib Resection/Thoracoplasty
43: Postlaminectomy Kyphosis
Section IV. Adult Spinal Deformity
Section IV-A: Adult Spinal Deformities
44: Degenerative/De Novo Scoliosis
45: Adult Postidiopathic Scoliosis: Decision to Operate
46: Kyphotic Deformities in the Adult
47: Cervical Spinal Deformity
48: Inflammatory Arthritic Conditions of the Spine
49: Vertebral Osteomyelitis in the Adult
50: Neoplasms of the Spinal Column
51: Adult Spine Trauma
Section IV-B: Non-Operative Treatment for Adult Spinal Deformities
52: Physical Therapy
53: The Use of Spinal Injections in Spinal Deformity Patients
Section IV-C: Surgical Treatment for Adult Spinal Deformities
54: Spinal Fusion
55: Posterior Spinal Surgical Techniques in Adult Spinal Deformity
56: Open Anterior Spinal Surgery in Adult Spinal Deformities
57: Sacropelvic Fixation in Spinal Deformity
58: Staging Procedures
59: Minimal and Lesser Invasive Approaches to the Anterior Spine in Adult Spinal Deformity
60: Revision Surgery
61: Spinal Osteotomies: Smith-Petersen and Pedicle Subtraction
Section V. Spondylolisthesis
Section V-A: Spondylolisthesis in the Pediatric/Adolescent Patient
62: Spondylolysis and Spondylolisthesis in the Pediatric Patient
63: Surgical Treatment for Pediatric Spondylolisthesis
Section V-B: Spondylolisthesis in the Adult Patient
64: Spondylolisthesis in the Adult Low-Grade Spondylolisthesis
65: High-Grade Spondylolisthesis in the Adult Patient
Section VI. Surgical Considerations and Complications
Section VI-A: Preoperative Considerations
66: Nutritional Concerns
67: Osteoporosis: Evaluation and Pharmacologic Treatment
Section VI-B: Considerations for Surgical Treatment
68: Surgical Planning
69: Anesthesia
70: Patient Positioning for Thoracolumbar Deformity Surgery
71: Management of Perioperative Blood Loss in Spine Surgery
72: Neuromonitoring
73: Avoiding Neurologic Deficits in Spinal Deformity Surgery
74: Bone Grafting
75: Prevention of Surgical Site Infections in Spine Surgery
76: Rehabilitation
Section VI-C: Surgical Complications
77: Neurologic Complications
78: Incidental Durotomy in Deformity Surgery
79: Structural Complications in Spinal Deformity Surgery
80: Proximal Junctional Kyphosis and Proximal Junctional Failure
81: Flatback and Other Postoperative Sagittal Malalignment Syndromes

DESCRIPTION *Techniques and methods employed in the preparation and application of DNA-Encoded Libraries.*

DNA Encoded Libraries (DELs) have transformed the way we explore chemical space, accelerating drug discovery and innovation. This volume contains a collection of articles, bringing together many of the leaders in the field, from both industry and academia, to explore the cutting-edge techniques, strategies, and applications that are reshaping the landscape of chemical synthesis.

The volume covers many aspects of this rapidly expanding field, from DNA-compatible organic reactions to innovative encoding methods and setup strategies, selection procedures, and advanced cheminformatic techniques.

Whilst background information is provided, the focus of the articles is on the techniques and methods: experts in the field present selected procedures, showing the state of the art in each area covered.

This volume is an indispensable resource for chemists, researchers, and professionals seeking to stay at the forefront of chemical synthesis and drug discovery.

CONTENTS

- 1 Introduction
- 2 DNA-Compatible Organic Reactions
 - 2.1 Amide-Bond-Forming Reactions
 - 2.2 Metal-Promoted DEL-Compatible C—C Bond Forming Reactions
 - 2.3 Metal-Free DEL-Compatible C—C Bond Forming Reactions
 - 2.4 On-DNA C—X (X = N, O, P, S, Se) Bond Forming Reactions
 - 2.5 On-DNA C—H Transformations
 - 2.6 On-DNA Photoredox-Catalyzed Reactions
 - 2.7 On-DNA Cyclization Reactions
 - 2.8 DNA-Encoded Isocyanide Multicomponent Reactions
 - 2.9 On-DNA Functional-Group Transformations
 - 2.10 Reversible Immobilization of DNA for Chemical Modification
 - 2.11 Covalent Attachment on a Solid Support
 - 2.12 Micelle-Mediated Synthesis
- 3 DEL Encoding and Setup Strategies
 - 3.1 DNA-Templated Synthesis
 - 3.2 DNA-Recorded Synthesis
 - 3.2.1 Single Pharmacophore Libraries

- 3.2.1.1 Encoding Using Double-Stranded DNA: A Headpiece-Based DNA Ligation Strategy
 - 3.2.1.2 Encoding Using Single-Stranded DNA (Iterative Splint-Ligation Procedures)
 - 3.2.1.3 Chemical Ligation/Encoding
 - 3.2.2 Dual-Pharmacophore Libraries
 - 3.2.2.1 Encoded Self-Assembling (Dynamic) Chemical Libraries
 - 3.2.2.2 Peptide Nucleic Acid (PNA) Encoded Libraries
 - 3.2.2.3 DNA-Encoded Dynamic Combinatorial Chemical Libraries
 - 3.2.3 Special Libraries
 - 3.2.3.1 Macrocyclic DELs
 - 3.2.3.2 Natural-Product-Enriched DELs
 - 4 Library Selection Procedures
 - 4.1 Selections by Affinity Capture on Solid Support
 - 4.2 DEL Selection Using DNA-Programmed Affinity Labelling (DPAL)
 - 4.3 Selections of DNA-Encoded Libraries to Protein Targets on Living Cells
 - 4.4 Selections of DNA-Encoded Libraries to Protein Targets within Living Cells
 - 5 Evaluation/Cheminformatic Methods
 - 5.1 Informatic Tools, Processing, and Evaluation of DEL Selection Data
 - 5.2 On-DNA Resynthesis and Affinity Selection Mass Spectrometry (ASMS)
-

Thieme Publishers New York Returns Policy

EFFECTIVE JANUARY 1ST, 2021

General Remarks

- All returns require prior permission, and need to be authorized
- All returns must be accompanied by the Authorizations form, as well as a copy of the invoice and packing slip, and must have been purchased directly from Publisher.
- A return will not be accepted without the correct accompanying paperwork.
- Trade partners must send written Requests to Return; the returned product has to correspond to the Request.
- Returns for credit must be within 18 months of invoice date.
- A book declared OP (Out of Print) must be returned within 3 months of the date of Publisher Notification and purchased within the last 12 months.
- Transit-damaged claims – where the damage occurred during the initial shipping from the publisher's warehouse to the original customer must be claimed within 30 days of invoice date.
- Any book with a damaged scratch-off code, or where digital ancillaries (CD-ROMs, DVD-ROMs) have been removed will not be accepted as a credited return.
- Short shipment claims must be accompanied by documentation (packing list, etc.) that validates and supports the claim.
- To receive a credit, returns must be in saleable condition. Damaged or unsaleable books will not be credited.
- Damaged is defined as a book that has been bent, dinged, broken, scratched, dented, or torn.
- No return will be given for offline electronic or audio visual material, including eBooks.

For any further questions, trade customers in North, South and Central America should contact customerservice@thieme.com
