3G procedure for exams and next vaccination campaign

Dear Students,

Due to current developments, the Bavarian Council of Ministers decided on 25.01.2022 that examinations will in future be accessible according to "3G" (vaccinated, recovered, or tested) conditions. Examinees who do not fulfil "2G" (vaccinated, recovered) can now take part in examinations with a valid negative PoC antigen test. A PCR test is therefore no longer required. This shall apply from 27.01.2022 and subject to any specifications to the contrary in the Bavarian Infection Protection Measures Ordinance.

The test centre at the University of Bayreuth campus in the SWO building offers appointments for PoC antigen rapid tests between 2.30 pm and 5 pm on Mondays to Fridays. These can be booked in advance at https://www.meintest.brk.de.

Non-participation in an examination (e.g. due to a self-isolation order or quarantine obligations) must be reported to the Examinations Office immediately and documented.

Vaccination drive on 28 January, 2022

Due to continuing high demand, we are holding another vaccination campaign on campus this week: On Friday, 28 January 2022, a mobile vaccination team will carry out first, second, or booster vaccinations for all interested parties (students, employees, guests) in the SWO conference room from 12.30 pm to 5 pm. Vaccines from the companies BioNTech/Pfizer and Moderna will be used.

Please book an appointment in advance at https://www.jameda.de/bayreuth/aerzte/innere-allgemeinmediziner/bastian-priemer/uebersicht/81357550_1/ and bring your vaccination card, your insurance card, and your valid identity card. You will receive an anamnesis form by e-mail in advance, which
you should fill out and bring with you. You will receive medical advice from the medical staff on site during the vaccination campaign.

We wish you a successful exam period!

Yours faithfully,

Prof. Dr. Stefan Leible  
*President*

Prof. Dr. Martin Huber  
*Vice-President for Teaching & Learning*

Dr. Nicole Kaiser  
*Provost*
