## Part B Fees for the use of central infrastructure facilities

The Airport Usage Regulations for Dortmund Airport define central infrastructure facilities in accordance with § 6 of the Ground Handling Services Ordinance (BADV).

For the provision and/or use of the central infrastructure facilities, airlines / aircraft owners in commercial traffic and in GAT traffic must pay a usage fee to the airport operator each time their aircraft lands/handles at Dortmund Airport.

The disposition of the central facilities, i.e. the determination of the quantity and period of availability, is made by Flughafen Dortmund GmbH. The following services and fees refer to the central infrastructure facilities defined in the Airport User Regulations.

### 1. Facilities for piloting and docking

The airport operator is responsible for the order of movements in the non-flying areas pursuant to § 45 LuftVZO. The aircraft are managed centrally by the apron control via suitable media, such as radio and follow-me vehicles.

### 2. Handling apron

The provision and operation of handling aprons with technical equipment, such as lighting and illumination systems, including the areas for taxiing to and from the apron and the near-position staging areas for handling vehicles and handling equipment, shall be carried out within the framework of the respective state of expansion. The parking positions are handling positions for the period of commercial activity. The handling positions are managed and operated by the airport operator.

### 3. Flight information system

The airlines must pay a fee for the use of the communications network and the central technological information facilities for the provision of ground handling services. The flight information systems are managed and operated by the airport operator.

### 4. Baggage handling system

The airlines must pay a fee for the use of the baggage handling systems (central baggage handling system for departing and arriving baggage, bulky luggage storage area, intermediate storage area). The baggage handling systems are managed and operated by the airport operator.

### 5. approval

The fee for the use of these infrastructure facilities is EUR 3.75 per handling/landing per 1,000 kg of MTOM for all positions.

### 6. Underground fuelling system

For the throughput of aviation jet fuels, a fee must be paid by the authorised handlers. The underground fuelling system is managed and operated as a central infrastructure by the airport operator.

The fee for the use of this infrastructure is 5.50 EUR per cubic metre of jet fuel. Invoicing is done directly between the underground fuelling system operator and the handlers.

## Part C PRM fees

For assistance at airports for disabled passengers and passengers with reduced mobility under EU Regulation No 1107/2006, a surcharge (PRM fee) is levied on all commercial flights based on the number of passengers on board at departure.

The surcharge for passenger flights per departing passenger is EUR 0.65.

## Part D Fees for handling services

### I. General Terms and Conditions for Handling Services in Passenger and Freight Traffic

1. **Basic services**  
Flughafen Dortmund GmbH, hereinafter referred to as FDG GmbH, manages the aircraft handling in the list of basic services in accordance with paragraph II, para. 1 and the handling services listed under Part E "Special Services" within the scope of their technical and personnel options itself or through commissioned companies.
2. **Standards for all services**  
The services are rendered in accordance with the usual procedures and international standards of FDG GmbH.
3. **Special services**  
Upon request, FDG GmbH also performs such services required for aircraft handling, which are not listed in the basic and special services list. Such special services are provided according to availability of personnel and equipment and charged separately.
4. **Employed personnel**  
FDG GmbH will carry out its provided services using trained personnel. Representatives of the airlines and FDG GmbH will meet if necessary, in order to discuss upcoming questions about the procedure and quality of ground handling services. When assessing the causes of pending handling problems, the punctuality of airlines should be taken into account.
5. **Vicarious agents**  
FDG GmbH is entitled to use third parties as vicarious agents. At the request of the airlines and/or FDG GmbH, both parties shall consult each other in the execution of the handling services and consider as far as possible mutually expedient recommendations.
6. **Extended services**  
FDG GmbH reserves the right to charge for any services caused by handling regulations and services that go beyond the service description in accordance with the list of fees for special services.
7. **Information**  
The airlines shall provide FDG GmbH with the information and instructions that will enable the airport to perform properly. If necessary, FDG GmbH shall request information and instructions from

the airlines. FDG GmbH shall pass on information contained in flight documents of the airlines only with their consent to third parties, as far as legal provisions do not oppose this.

8. Scheduled flights

FDG GmbH undertakes to provide ground handling services for scheduled flights of the airlines at Dortmund Airport without prior request. Scheduled flights are commercial passenger transport flights that are carried out on a regular basis and have to be reported to FDG GmbH before the beginning of each flight schedule period so FDG GmbH can fulfil the services to be provided. The airlines are obliged to inform FDG GmbH about the number and the traffic data for the planned flights within a flight schedule period. This includes the type and version of the aircraft, the flight number, the planned arrival and departure times, the airport of departure, as well as any significant special issues relevant to the handling. The airlines are also obliged to notify FDG GmbH as soon as possible of any changes affecting scheduled flights. This applies in particular to delays, premature arrivals and the cancellation of flights.

9. Non-scheduled flights, special flights

FDG GmbH will provide ground handling services as soon as possible for non-scheduled flights operated by the airlines or on their behalf at Dortmund Airport, taking into account the commitments already made, within the limits of their technical and human resources. The airlines undertake to announce these flights well in advance.

10. Priority

If, as a result of unregistered or delayed aircraft, there is an overlap in the handling of aircraft of other airlines, FDG GmbH reserves the right to handle the scheduled and registered aircraft with priority.

11. Documents for ground handling services

The airlines of FDG GmbH will provide documents and information in a timely manner for the implementation of ground handling services.

12. Special assistance (emergencies)

In emergency situations (emergency landing, accident), FDG GmbH shall immediately take all reasonable and possible measures to assist the passengers and the crew, even without the instructions of the airlines, and protect any baggage, cargo or mail transported in the aircraft against loss or theft. § 29 LuftVG must be followed in the event of a violent act.

The airlines shall reimburse FDG GmbH for the resulting costs.

13. approval

Handling fees for the basic services performed by FDG GmbH are payable in accordance with the list below, irrespective of the extent actually used. For additional and special services which are not included in the basic services but which are used by the airlines, a fee must be paid according to the list below.

Offsetting against counterclaims is only permitted with the consent of FDG GmbH.

The handling fees and special service fees are considered fees within the meaning of § 10 para. 1 of the Value Added Tax Act. The airlines therefore have to pay VAT separately.

14. Adjustment of fees

FDG GmbH has the right to adjust its handling fees according to the development of costs or for important reasons. The adjustments shall be communicated to the airlines one month before entry into force.

15. Terms of payment

Airport fees are payable in EUR before take-off. Invoicing and payment will be immediate in these cases.

Upon request, an agreement can be reached with the debtor that the airport fees will be invoiced at fixed intervals if the following conditions are met:

- Bank transfers of reasonable advance payments on the airport fees incurred
- Appropriate credit security is provided – in particular, direct liability or deposit. The credit security is sufficient if it covers the fees to be paid by the debtor to an appropriate extent.

In these cases, invoicing takes place on a monthly basis. Invoices are to be paid immediately after receipt of invoice in EUR. Cash discounts are not granted. In the event of default of payment, the assertion of default interest remains reserved in an appropriate amount. The right of the debtor to a repayment arrangement is excluded. Offsetting with claims that are not recognised or legally established is excluded.

Complaints can only be considered within a period of 4 weeks from the invoice date.

If there is a delay in payment, aircraft handling may be interrupted or completely refused.

16. Liability

FDG GmbH is not liable for damages sustained by the airlines or for claims for damages against the airlines arising in connection with the services to be performed by FDG GmbH, unless such damages or claims for damages have been caused by or are due to intent or gross negligence in the conduct of FDG GmbH, its personnel, or its vicarious agents.

The airlines shall indemnify FDG GmbH from all claims of third parties, including costs, which are asserted in connection with the services taken over by FDG GmbH, unless such claims are due to intentional or grossly negligent conduct of FDG GmbH, its personnel, or its vicarious agents.

In individual cases, liability does not go beyond that of the airlines to their contractual partners.

The contracting parties shall be released from their obligations if one of the contracting parties is unable to fulfil its obligations as a result of industrial disputes, force majeure or any other reason beyond its sole choice.

## 16.1. Liability for freight handling

Unless otherwise stated above, the General German Carriage Conditions (ADSp) apply in their current version. These conditions limit, in section 23 ADSp, the legal liability according to § 431 HGB, for damages during carriage custody, to 5.00 EUR/kg; for multi-modal transports, including transport by sea, it is limited to 2 SDR/kg and, in addition, per claim or event to 1 million EUR or 2 million EUR or 2 SDR/kg, whichever is greater. Section 27 ADSP is not considered to be an agreement on other maximum liability amounts within the meaning of art. 25 of the Montreal Convention.

## 17. Airport Use Regulations

The Airport Use Regulations (FBO), as amended, form part of these terms and conditions.

## 18. Miscellaneous

The general terms and conditions and contractual relationships based thereon are subject to the law of the Federal Republic of Germany.

Dortmund is the place of performance for all services, in particular the payment obligations of the contractual partner. The jurisdiction is Dortmund.

In the event of a dispute, the German version of these provisions takes precedence over the English translation.

Changes and additions to this list are reserved.

If any provision of these terms and conditions does not comply with the statutory provisions, this provision shall be replaced by a provision permitted by law which comes closest to the will resulting from the invalid provision. The validity of the remaining provisions remains unaffected.

## II. Description of basic services: ground handling services

### 1.1 Passenger and baggage handling / aircraft handling / loading and unloading services

#### Passenger and baggage handling

- Returning appropriate passenger and crew stairways to and from the aircraft at remote locations
- Provision and operation vehicles for the carriage of passengers between the aircraft and the terminal
- Provision and return of suitable loading and unloading devices and vehicles to and from the aircraft
- Provision and operation of suitable equipment for the carriage of cargo between the aircraft and the terminal
- Transport of checked baggage from the baggage take-off point to the aircraft
- Transport of the arriving baggage from the aircraft to the baggage return area, distribution via baggage carousel

#### Aircraft handling

- Parking (standby and instruction; presentation – removal of the brake wedges)
- Departure
- Safety measures (immediate reporting of all perceived defects in the aircraft or the load to the client without prejudice to the question of cause or time).

#### Loading and unloading services

- Opening and closing of the cargo hold doors and hatches with control if necessary by the airline (LVG)
- One-time loading, stowage and securing of the cargo according to the written instructions and, if necessary, with control by the airline (lashing material is provided by the airline)
- One-time unloading of the loads according to the written instructions of the airline
- Handover – receipt of the loads

### 1.2 Passage services

- Provision of the staff for the check-in process and boarding process within 2 hours before the scheduled departure
- Provision of Lost and Found personnel upon arrival
- Execution of passage services
- Provision of check-in counters and gate counters with the necessary technical equipment
- For ferry departures: Provision of Lost and Found personnel upon arrival

## III. Fees basic services ground handling services

### 1.1 Fee calculation

The assessment basis for the charges according to II.1.1 to II.1.2 for passenger aircraft is the current seat capacity of the aircraft. The maximum seat capacity is taken as a basis until the presentation of corresponding proof. Retroactive refunds will not be made.

For private aircraft from 2.7 t to 5.7 t and aircraft in own-account traffic from 2.7 t to 5.7 t, the handling fee is €30.

### 1.2 Level of fees for passenger, baggage and aircraft handling / loading and unloading services

The handling fee according to III.1.2 includes the provision of handling personnel as well as the necessary basic equipment for handling-related vehicles and devices (stairs, GPU, commuter bridge, push-back, warning traffic cone and conveyor belt vehicle). It amounts, per process for aircraft, with

up to seats	EUR
6	69.45
10	90.21
20	128.41
30	195.01
40	386.97
50	690.22
60	754.73
70	807.84
80	860.94
90	914.04
100	1,003.45
110	1,063.60
120	1,121.52
130	1,170.76
140	1,214.95
150	1,268.27
160	1,317.50
170	1,379.30
180	1,428.53
190	1,481.62
200	1,529.92

up to seats	EUR
210	1,578.17
220	1,626.46
230	1,674.73
240	1,719,72
250	1,762,23

### 1.3 Level of fees for passenger services

The handling fee according to II.1.2 is per process for aircraft with

up to seats	EUR
30	525.31
50	663.19
120	802.39
230	927.68

### 1.4 Special regulations

#### 1.4.1 Flat handling fee

The fee for handling services in accordance with para. 1 is a flat rate fee; the non-use of partial services of ground handling services does not result in a discount on the flat rate. Registered flights that are cancelled between the scheduled arrival time and 48 hours before the scheduled arrival time are charged at 50% of the basic charge for the handling service requested.

#### 1.4.2 Handling on return to the handling position

If an already-handled aircraft returns to the handling position prior to departure, no renewed fee will be charged, provided only the crew and passengers disembark. However, if the aircraft is unloaded and/or loaded again, the full fee must be paid again.

#### 1.4.3 Separate handling

In the event of separate handling, i.e. when the arrival or departure of an aircraft are no longer directly related (overnight stay, flight termination, transfer, etc.) or if the time between arrival and departure of an aircraft is more than 3 hours, the handling fee for basic services increases by 50% to 150%; with a stay of the aircraft over 24 hours, the fee increases by 100% to 200%.

## 1.4.4 Handling after 22:00

For the handling of the aircraft in scheduled traffic after 22:00 local time, the handling charge for basic services increases by 75% to 175%; and for handling in non-scheduled traffic additionally a handling fee of 300 EUR is calculated on the basic service for every 30 minutes.

## 1.4.5 Handling during technical landings

In the event of technical landings (handling without change of cargo), no basic service fees will be charged.

## 1.4.6 Handling of cargo and ambulance flights or aircraft with special seating configuration

For pure cargo flights, ambulance flights and aircraft with special seating configuration (VIP equipment), the handling fee is calculated according to the maximum permissible seat capacity of a passenger aircraft corresponding to the type of aircraft used.

## 1.3.7 Other services

For further services, the fee is determined according to the type and scope of the services.

## IV. Fees for additional services

### 1. Aircraft de-icing

For the de-icing of aircraft, the airport operator provides a de-icing vehicle with driver and de-icing fluid at the request of the aircraft operator. The professional de-icing is carried out by the airport operator or its contractor.

Requested but unused de-icing will be charged at 50% of the basic charge.

#### 1.1 Fee calculation

The amount of the fee to be paid for the de-icing will be calculated according to the maximum take-off mass of the aircraft (MTOM) recorded in the authorisation certificate.

#### 1.2 Fee amount

The fee for motorised aircraft with a maximum take-off mass of

for aircraft	EUR
under 5,700 kg	720.80
from 5,700 kg to 20,000 kg	1,441.64
from 20,001 kg	1,906.81

#### 1.3 De-icing / Additive media

The de-icing agents are also calculated according to consumption at the current daily price. The airport operator assumes no liability for damages of any kind for the mixing ratio and the effect of the product. The aircraft operator must verify the suitability of the product for its product before use.

Provision of additive media (water) per litre

0.31 EUR

## Part E Fees for special services

The following special services are carried out on request, as far as the conditions for this are given and they do not already have to be provided due to operational requirements. There is no legal claim to the performance of these services unless contractual obligations exist. Performed services and deliveries not included in this list will be charged separately.

The minimum calculation unit for special services is the specified calculation unit. Unless otherwise specified, started units will be charged in each case.

Requested but unused special services are charged at 50% of the respective basic charge.

The prices indicated in price lists and offers are non-binding. The rate of value added tax applicable on the day of the service will be billed separately, unless a value added tax exemption according to the Value Added Tax Act exists. Decisive for the VAT exemption is the invoice recipient.

Changes and additions to this list are reserved.

Service	Unit	Euro
<b>I. Operations</b>

## II. Inside parking fees

The following daily rates apply to the storage of aircraft without rental agreements for the hangar parking space (short-term settings). The following monthly rates apply to the storage of aircraft with rental contracts for the hangar parking space (long-term settings [contract duration at least one year]). In the case of long-term parking, a rental agreement is concluded between the aircraft operator and the airport operator before the start of the parking. Indoor parking spaces subject to availability.

If a hangar parking space is not used and the aircraft is parked on an apron, Flughafen Dortmund GmbH reserves the right to charge for this parking in accordance with III. parking fees of Part A of the Fee schedule (fees subject to approval).

<b>GAT aircraft inside parking (without halls and lobbies)</b>		
Weight in kg MTOM	Daily rate EUR	Monthly rate EUR
Aircraft up to 750 kg	20.43	333.23
Aircraft 751 kg - 1,000 kg	22.77	398.75

Ambulance	Per started 60 min.	105.05
Environmental protection vehicle	Per started 60 min.	196.98
Roll-off container set-up	Per started 60 min.	420.22
Roll-off container rescue	Per started 60 min.	420.22
Sweeper	Per started 60 min.	196.96

Other fire fighting vehicles, special vehicles, transport trays and fire fighting equipment on request.

Fire alarm per building

According to effort

#### 3. Other services

Cleaning of ambulance	Instance	247.12
Disinfection of ambulance	Instance	439.32
Spraying of engine	Instance	302.04
Spraying of the apron/position	Instance	219.66
Safety monitor for welding	Per started 60 min.	77.55
Security guard during welding work with vehicle	Per started 60 min.	275.75
Security guard at events per firefighter	Per started 60 min.	77.55
Security guard at events with a vehicle incl. driver	Per started 60 min.	220.80
Cooling aircraft brakes	Instance	480.51
Extinguishing media, setting agents and other and material	According to effort	

Service	Unit	Euro
<b>4. Recovery equipment</b>		
Recovery equipment for aircraft up to 5.7 t	Per started 60 min.	204.85
Recovery equipment for aircraft up to 5.7 t	Daily rate	1,042.68

The conclusion of a recovery contract is necessary for the use of the recovery equipment. The hours for the recovery forces and the recovery service of the FDG GmbH are settled according to the corresponding items in this fee schedule.

<b>5. Provision of fire protection</b>		
Provision of fire protection when refuelling an aircraft with passengers	Instance	125.35

## IV. ID card system / key services

<b>1. Airport identification cards</b>		
Issue of an airport ID	Unit	29.85
Late return of an ID	Unit	54.26
<b>2. Access permits / Parking permits</b>		
Issue of a parking permit	Unit	14.32
Issue of apron permit	(per car/year)	65.12
Daily access permit without parking space	per car	5.97
<b>3. Locksmith</b>		
Individual keys (locking systems)	Unit	50.42
Key clip (locking systems)	Unit	63.03
Production of security keys	Unit	11.22
Production of moulded keys	Unit	13.46
<b>4. Aviation security training for "miscellaneous personnel" under EU Regulation 2320/2002</b>		
Instruction according to Air Safety Law in theory	per participant	67.40

Further training on request.

Service	Unit	Euro
