

Supply Chain Resources-Labels

IFCO SYSTEMS is committed to ensuring the safe transport of food products in our Reusable Plastic Containers (RPCs) and meeting current food labeling requirements.

We work hard to deliver the highest quality RPCs to our customers. IFCO RPCs are recollected after each use and inspected, washed, rinsed and sanitized under our strict global hygiene and sanitation standards and returned to the pool for use again.

IFCO employs a continuous improvement process, monitoring variables that impact the delivery of a serviceable RPC to all of our customers. In collaboration with growers, retailers and label providers, IFCO has developed a list of compliant labels authorized for use on our RPCs. The use of any non-compliant label on our RPCs may result in **enforcement action**.

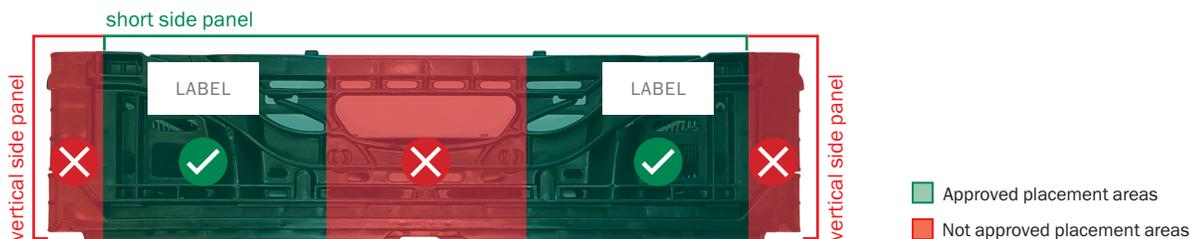

Approved Labels and Providers

The labels on the approved list are all competitively priced compared to labels in the same category that are not on the approved list. Customers can refer to https://www.ifco.com/supply_chain_resources for all suppliers and exact labels that have been approved.

The products approved for use in the **Label and Adhesive Specification Document** are universal and can be obtained from the suggested suppliers found on the IFCO website, or your preferred label supplier as long as the label meets all specifications on the approved list. **Only the exact combinations of adhesive and substrates in the list are approved for use so please order accordingly.**

It is highly recommended to avoid over purchasing labels, as the labels have a best by date and the adhesive can deteriorate or become harder to remove after a certain time period.

Correct and Incorrect Placement Example

Please refer to https://www.ifco.com/supply_chain_resources regarding exact placement of labels for each unique RPC size.

General Label Placement Guidelines

- Should only be applied to the short panel end walls
- Should not be applied on the long side panels, bottom or inside the RPCs
- Do not wrap label around handle
- Only one label should be applied to each RPC and cannot be any larger than 4" wide x 2" tall (inches)
- If using larger RPC, label should be placed on dimpled areas not on corner locks
- Do not adhere labels under tines/card holder prongs, this is for cardstock only that is not glued to the RPC
- For 6408, 6411 and 6413 only a film label may be used, not paper
- Do not apply oversized pallet labels directly to RPCs but instead to the outer shrink wrap

For further questions related to labels, please go to https://www.ifco.com/supply_chain_resources for additional information.
