**World of services**

**Key Facts**

Founded	2002
Personnel	500
Capacity	64,000 m <sup>2</sup>

Lufthansa Technik Malta (LTM) was established in 2002 and began operations in 2003 as a joint venture between Lufthansa Technik AG (92 %) and Air Malta (8 %). Based at Malta International Airport in Luqa, the maintenance, repair and overhaul (MRO) company offers its customers extensive base maintenance services for the Airbus aircraft types A320/A330/A340/A350 and the B787. Additionally ad hoc line maintenance is also available.

## Lufthansa Technik Malta

### Service spectrum

Initially specializing in C-checks and extensive aircraft modifications, the company has meanwhile significantly expanded the range of services offered following the construction of a hangar complex amounting to a total of 64,000 square meters of floor space. Today the range of services Lufthansa Technik Malta offers includes structural work, the repair of composite materials, interior work and aircraft parts painting.

The Lufthansa Technik Malta facility employs over 500 personnel with a good number of technical staff having completed aviation related studies at the acclaimed Malta College of Arts, Sciences and Technology (MCAST), with further regular groups of MCAST apprentices undergoing on the job training on the shop floor.

### In focus: Narrowbody and widebody overhaul

At present, the facility operates three narrowbody and three widebody aircraft overhaul lines providing line and base maintenance services for the Airbus A320, A330, A340, A350 and Boeing 787 aircraft types.

### Outlook

Thanks to its strategically favorable location in the Mediterranean close to the African continent and the Arabian Peninsula, and the significantly expanded service and product portfolio, Lufthansa Technik Malta is well equipped for the future. Given its high quality standards, cost efficiency and the minimal turnaround times achieved, Lufthansa Technik Malta will be able not only to consolidate its competitive advantage, but to expand further in the future as well and invest in new aircraft types and innovative technology.
