

USM Solutions

Trusted source for your
aircraft parts

Refurbished aircraft parts can be a smart way to enhance your competitiveness. As a global leader in MRO services, Lufthansa Technik provides spare parts directly from our shop visits, meeting both the highest quality standards and your specific requirements.

The procurement of aircraft parts is often associated with long lead times and high costs. This is where Lufthansa Technik's USM solutions offer a reliable alternative. We manage one of the largest active USM inventories in the aviation industry, ensuring rapid material availability without the need for intermediaries. All components we offer are fully serviceable, certified, and refurbished to the highest industry standards—backed by the quality Lufthansa Technik is known for. Take advantage of our extensive material pool and our meticulous approach to ensuring efficient operations.

**You can find our inventory on Aeroxchange:
CAGE Code 6MJ89**

Benefits

Cost efficiency

Save significantly compared to new OEM components without sacrificing quality.

Better availability

USM parts are readily available, helping you minimize maintenance delays and get back in the air faster.

Top-Tier reliability

Every part undergoes rigorous testing and certification, ensuring the highest safety and performance standards.

Flexible solutions

Choose from purchase, loan and exchange options to fit your operational needs.

Direct access

Order directly from your regional key account manager to simplify your procurement process.

Sustainable choice

Support resource conservation, reduce waste, and lower your carbon footprint with eco-friendly refurbished components.

MRO Services

Customer Service/Sales

Warehouse

No middleman, no delays.

This is how we procure USM parts—from request to delivery.

1 Request for Parts

Your RFQ reaches our USM team via e-mail and all major platforms.

2 Stock Check

We verify availability in our USM pool, one of the largest worldwide.

3 Negotiation and Purchase

Our team provides details on part condition and documentation, along with a purchase offer.

4 Technical Inspection

We ensure that all parts are serviceable, reliable, and ready for use.

5 Direct Shipment

We ship USM parts directly to where they are needed, including all required certifications.
