

# Strong in small parts

## Consumables & Expendables

Managing countless part numbers, fluctuating costs, and multiple suppliers is a daily challenge for all aircraft operators. Lufthansa Technik reduces this complexity by acting as your single, reliable source for the full spectrum of consumables and expendables (C&E) – ensuring high availability while enhancing procurement efficiency and cost control.

C&E items may be small, but they are mission-critical, too. A single missing part can ground an aircraft. That's why a dependable, end-to-end supply concept is essential. Lufthansa Technik provides centralized access to more than 500,000 part numbers from over 1,000 qualified suppliers – including gaskets, O-rings, bolts, screws, fuses, relays, and rivets.

A significant share of these parts is permanently stocked in Lufthansa Technik warehouses at major international hubs. This ensures immediate availability, predictable total cost, and a streamlined procurement process – all from one trusted partner.

### Benefits

One reliable supplier for 500,000+ part numbers

Reduced sourcing complexity and minimized internal workload

Global warehouse network enabling fast and dependable delivery

Proven global C&E expertise across all established aircraft types

Seamless IT integration via interfaces to AMOS, TRAX, AEX, and more

Preferred commercial terms ensure stable pricing through global sourcing power

Easy ad hoc purchasing via multiple channels or the LHT web-based platforms

Dedicated 24/7 C&E AOG support for critical situations
