Lufthansa Technik Middle East

**Close to you,
far from ordinary**

Key facts

Founded	2017
Personnel	101
Capacity	5000 m ²

As a global group of companies with a highly flexible network of locations and facilities throughout the world, Lufthansa Technik Middle East is never far away from your maintenance, repair and overhaul needs. In response to the growing demand for on-site technical services and to be ever closer to its customers in the region, Lufthansa Technik Middle East in Dubai today bundles all the company's technical services and sales activities for the strongly growing regional aviation market.

A world of services at your doorstep

Local capabilities in the region With the facility in place, local spares support and material availability are offered to customers in the region. The shop in Dubai is the local address for the repair of nacelles and composite structures, while also offering on-site maintenance services support.

ARC® Workshop in Dubai

Nacelle and composite services

The Airframe Related Component (ARC®) experts of Lufthansa Technik Middle East are true masters when it comes to handling the complexities of aircraft composites.

- Inlet Cowl
- Fan Cowl
- Thrust Reverser
- Common Nozzle

Lufthansa Technik Middle East specializes in nacelle-related services for all major engine and commercial aircraft types, and have close working relationships with all the relevant

manufacturers. ARC® customers profit from a state-of-the-art infrastructure, and the strength and experience of a highly qualified workforce and a fully equipped workshop in Dubai.

- Flight Controls
- Radomes

Our ARC® shop in Dubai offers aircraft operators direct regional access to our renowned experts in composites and bonded structures with top-notch quality and reliability for all aircraft types.

Component Loan, Exchange & Material Services

Tailored solutions for your MRO needs

Efficient and uninterrupted aircraft operations are crucial, which is why our comprehensive spares pool service is part of our aircraft MRO offerings. Our flexible and cost-effective solutions reduce inventory costs, optimize operational efficiency, and minimize maintenance downtime with a large inventory of units for all aircraft types, along with tailored leasing options.

Loan, Exchange and Outright

At Lufthansa Technik Middle East, we offer aircraft units for loan and exchange at highly competitive rates. Our fast response time enables us to provide reliable support to airlines, ensuring uninterrupted flight operations.

On-Site Support Services

With our dedicated team in Dubai, we provide comprehensive onsite airline support services. Our skilled professionals will promptly be dispatched to the affected aircraft's location for direct on-site support and repairs.

Cycleclean® Engine Wash

Engine washing quick and simple

Lufthansa Technik's revolutionary engine washing technology, Cycleclean® is now available locally for customers in the Middle East. Lufthansa Technik provides engine wash services from its facility and also locally to customers in the region. Proven by more than 150,000 successful washes, Cycleclean® enables aircraft operators to clean their engines very quickly and easily. This product offers substantial time and cost savings and is an efficient way to make optimum use of the engine's life cycle. The latest generation of Cycleclean® enables engine washes to be completed in less than one hour per engine, resulting in fuel flow savings of upto 1.5 percent.
