

Upgrade Your Boeing 787 Dreamliner

Cabin modification
for the 787

When you are planning to refresh the interior of your Boeing 787 Dreamliner, Lufthansa Technik is the perfect partner. As the only Boeing Licensed Service Center in the world, we are able to cover all aspects of a cabin modification for the 787 family – from cabin definition to integration and certification.

New seats, in-flight entertainment, a modified galley or preparing your airplane for a lease transition: There are many possible reasons for revamping the interior of a 787. With our extensive cabin modification capabilities, Lufthansa Technik offers an attractive approach to modernizing your 787.

We are licensed by The Boeing Company to provide cabin modification services for the entire 787 family, such as design, integration, certification, material supply and on-aircraft installation. Our Special Engineering Services engineers will obtain all the necessary approvals and documentation to operate your newly modified 787 Dreamliner. Our Aircraft Maintenance Services experts can carry out any reconfiguration you require.
