

# Single Component Maintenance

Stop scrapping, we can fix it

With Single Component Maintenance, Lufthansa Technik offers a streamlined and highly reliable repair and overhaul process for aircraft components spanning all manufacturers and technologies.

Whether you are a small or large operator, an MRO provider, or a parts trader—Lufthansa Technik's Single Component Maintenance (SCM) provides the ideal solution for repairing aircraft components. Our support ranges from single repair events to exclusive or non-exclusive long-term agreements, covering any scope of part numbers and events.

We ensure high-quality repair procedures and fast turnaround times by continuously pushing the boundaries of innovation and cost efficiency. Our in-house workshops specialize in avionics, water and galley equipment, hydraulics, fuel systems, pneumatics, and emergency equipment.
