

Lufthansa Technik

Keep Components Moving

From Supply Chain to Repair.
One Integrated Solution.

Excellence in Motion

Whether you need a single part or comprehensive component support: Lufthansa Technik is your trusted partner for spares and repairs across EMEA. We combine one of the world's largest material pools with decades of repair expertise on Boeing and Airbus aircraft.

As an EASA Part 21J design organization, we develop in-house repairs that offer a smart alternative to costly OEM parts. Each one meets the highest safety and quality standards. Combined with PMA parts and innovative techniques, they extend component life and keep parts out of the scrap bin. Lufthansa Technik's extensive in-house repair capabilities, engineering expertise, and integrated supply chain network enable faster turnaround times and reliable component support across a broad range of technologies.

With a network spanning the entire EMEA region, we give you fast access to our material stocks when every hour counts. Loan, exchange, or sale: we deliver wherever you operate. If your aircraft is grounded, our AOG Materials Desk is available 24/7.

Benefits

Modular product portfolio

Engineering know-how

Unique repair methods

One of the largest component pools worldwide

Extensive knowledge of all Boeing and Airbus aircraft

AOG Materials Desk available 24/7

Logistics services

+960,000

events over the last five years

+11,800

part numbers handled over the last five years

+207,000

events inducted at Hamburg and Frankfurt in 2025

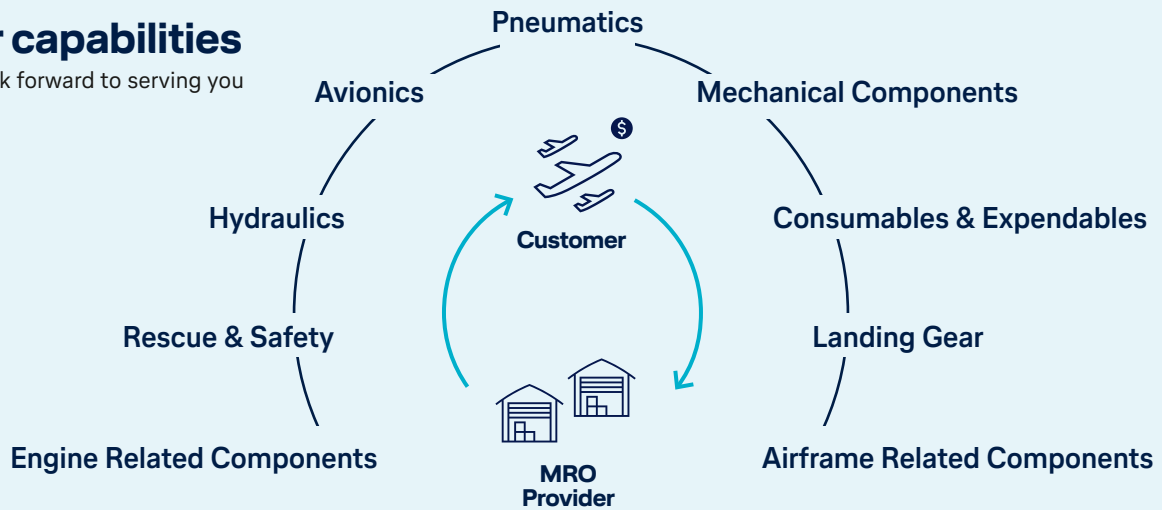

+7,400

part numbers handled in 2025

Our capabilities

We look forward to serving you

Components Services tailored to your needs

TCS Total Component Support - MRO - Cost Assurance - Pool Access - Asset Management	TCM Total Component Maintenance - MRO - Fast TAT - Not-to-exceed TAT - Cost Assurance	SCM Single Component Maintenance - MRO - Fast TAT - Average TATs

Our services

Total Component Maintenance (TCM)

Closed-loop repair and overhaul for selected parts or complete aircraft. A per-flight-hour rate keeps your costs predictable.

Single Component Maintenance (SCM)

Tailored repair and overhaul for single components, from one-off events to long-term agreements. Every unit returns serviceable and backed by Lufthansa Technik's globally recognized warranty.

Consumables & Expendables (C&E)

More than 400,000 parts from thousands of suppliers in one integrated supply solution. Even the smallest parts are covered, backed by 24/7 AOG support.

Single Component Availability (SCA)

Loan, exchange, or sale of components from one of the world's largest pools, available 24/7 for routine and AOG requests. Every component is backed by Lufthansa Technik's globally recognized warranty.
