

Lconnect

Connecting your aircraft

We make in-flight entertainment and connectivity (IFEC) available to your passengers in the shortest possible time.

Connectivity has not only become a true “must-have” for shaping passenger entertainment but is transforming aviation far beyond. With over 20 years of expertise, Lufthansa Technik integrates broadband into all areas of operations and offers tailored connectivity solutions, including professional guidance throughout the entire integration process – from suggesting appropriate hardware to the development process and supporting the installation schedule with your flight operations.

Benefits

Tailored solutions for every customer & aircraft type

Vast & strong supplier network, delivery & availability

Certification requirements for all aviation authorities

One-stop-shop with Part 21J, 21G & 145 capabilities

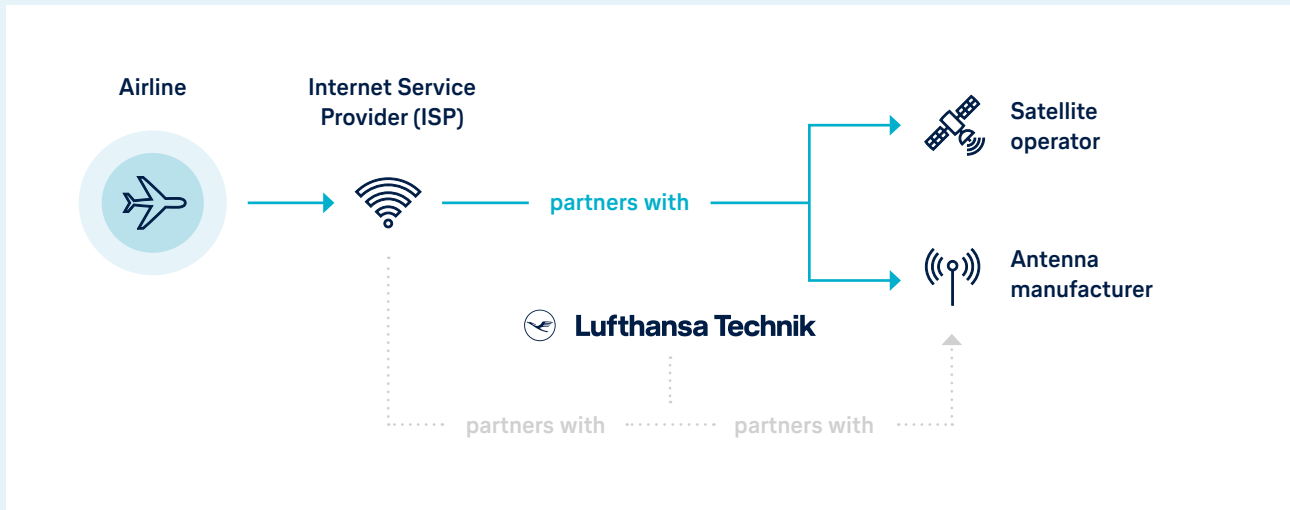

High flexibility without long-term contractual obligation

Low aircraft downtime

Lufthansa Technik

High time to connect your fleet

Full integrator of next generation connectivity solutions

In today's fast-changing market, connecting your fleet requires both technical expertise and dedicated business model solutions. Lufthansa Technik supports customers from the earliest planning stages and understands how future technologies and evolving passenger needs impact retrofits and conversions.

We offer worldwide one-stop integration and full authority approval (EASA 21J). Our smart, upgradeable design solutions ensure maintainability and future readiness.

With Lconnect, we are your partner for connected aviation. By cooperating with a wide range of satellite providers, antenna manufacturers, and software suppliers, we offer you the best connectivity solutions tailored to your needs.
