

Need your

ADIRU

repaired?

We've got you covered.

Lufthansa Technik is licensed to repair Honeywell's Air Data Inertial Reference Unit.

With the right tooling, test equipment, and OEM partnership in place, we deliver a true one-stop-shop solution for maintaining your Air Data Inertial Reference Units (ADIRUs). All required upgrades and repairs are performed at our Tulsa, Oklahoma facility—strategically located in the heart of the Americas to minimize transit time and logistics complexity. With ready access to shop-replaceable units (SRUs), we reduce the risk of operational delays and accelerate turnaround times for your components. Our streamlined processes and in-house capabilities also help drive cost predictability and reduce total lifecycle maintenance spend.

Benefits

One-stop-shop solution

Availability of SRUs for reduced TAT

Local processing at our Tulsa, Oklahoma facility

Right tooling and equipment onsite

Part number HG2050ACx, HG2050BCx
