

Need your

ADIRU

retrofitted?

We've got you covered.

Lufthansa Technik is licensed to upgrade Honeywell's Air Data Inertial Reference Unit.

Lufthansa Technik is partnering with Honeywell in a joint effort to satisfy the latest service directives for operators to upgrade their ADIRUs. The best part is, we conduct all required upgrades and repairs at our Tulsa, Oklahoma, facility – right in the heart of the Americas.

With direct access to Honeywell's parts supply, we reduce the risk of operational delays and provide quicker turn-arounds for your units. We have the right tooling and equipment onsite for you to take advantage of our OEM partnership and one-stop-shop solution when upgrading your ADIRUs.

Benefits
