

Lufthansa Technik
AERO Alzey

Big in Small Engines

Lufthansa Technik AERO Alzey has over 35 years of experience in maintaining, repairing and overhauling aircraft engines. Today, we are considered one of the leading independent service providers for a range of engines including CF34-series turbofan engines, PW100-series and PW150 turbo-prop engines, and the latest family members, PW1500G and GE Passport.

LTAA has earned industry recognition for delivering top-notch maintenance services and repairs to both regional airlines and business aviation operators. As a General Electric and Pratt & Whitney authorized repair and overhaul facility, LTAA is approved by FAA, EASA, and several other regulatory bodies. Our services encompass engine overhaul and repair, HSI, engine conversions, worldwide onsite support, and outstanding engineering services and support, which our customers greatly praise.

To ensure aircraft are up and running quickly, LTAA offers a comprehensive lease portfolio of CF34-series, PW100, and PW150-series lease engines, providing customers with flexible and efficient support.

See LTAA's Benefits for Yourself

Maintenance, Repair and Overhaul

We understand the unique needs of all players in the aviation industry. We offer top-of-the-line engineering and services tailored to meet those needs.

Asset Management

We specialize in connecting asset management and engine leasing, providing flexible solutions for phase out support and teardown options to optimize asset value.

Engine Leasing

Our Lease Engine Portfolio is readily adjustable to meet your needs, providing quick solutions to any engine-related issues.

On-site Services

Our on-site service teams work efficiently and quickly to minimize downtime and the need for extensive maintenance procedures, reducing the number of shop events, engine changes, and spare engines required.

Single Parts Repair

Our extensive experience and modern equipment enable us to offer cost-effective repairs for parts, eliminating the need for costly replacements.

Logistic Services

Our status as an Authorized Economic Operator and our relationship with the US Status C-TPAT simplify the supply chain process and allow for shorter shipping TAT for our customers.

LuCIS

Our own developed customer information system, LuCIS, provides full visibility of engine shop processes to our customers.

LTAAs were founded as a subsidiary of an airline (DLT, now Lufthansa Cityline) and has since grown to become one of the largest independent MRO providers in the world. We pride ourselves on combining the best of both worlds - the operators' drive for fast and feasible solutions and the MROs' commitment to sustainable and trustworthy results. At Lufthansa Technik AERO Alzey, we focus on meeting and exceeding our customers' expectations and needs by providing fast, reliable, and cost-effective solutions while maintaining the highest quality standards. In addition to our main in-house engine Maintenance, Repair & Overhaul service for turbofan and turboprop aircraft operators, we also offer smooth, intertwined processes such as Engineering, Engine Leasing, Logistics, and more, to guarantee 360° customer care and tailor-made solutions.
