

Pilot seats

Every aircraft's got 'em —
So do we!

Lufthansa Technik offers EASA Part-21J-approved repair and material exchange solutions for A320 cockpit seats. Instead of full replacement or full exchange, we focus on repair and exchange of affected material only, allowing operators to extend seat life while minimizing material usage and replacement costs.

Local repair solutions at our Tulsa, Oklahoma facility will be available by the end of 2026, so make sure to get the conversation going with our teams onsite.

Benefits

Alternative material solutions, approved under EASA 21J

Repair instead of replace

Lowered material consumption

Structural repairs to cracks and damages

Cost-effective and sustainable

Part number

Captain Seat: TAAI3-03PE20-01

First Officer Seat: TAAI3-03CE20-01
