

IDG repair in the Americas

Power you can rely on.

The Integrated Drive Generator (IDG) is a critical aircraft component and a key element of the electrical power generation system.

With roughly 100 unique FAA-approved replacement or modification parts (C1008/PMA) and access to numerous alternative parts, Lufthansa Technik offers a repair-focused IDG maintenance solution designed to avoid replacing your entire unit. Availability of shop-replaceable units (SRUs) further reduce turnaround time.

The best part is: We do it right in the heart of the Americas, in Tulsa, Oklahoma. Starting Q3 of 2026, you can take advantage of local repair capabilities and engineering excellence for your IDG maintenance needs.

Benefits

Repair instead of replacing

C1008/PMA available

Access to alternative parts and SRUs for reduced TAT

Local repair in Tulsa, OK
