In collaboration with

**MCAST**

**Lufthansa Technik Malta** is offering a paid training programme to candidates who would like to start a career in the Aviation industry and thus follow the training programmes offered by our Company in collaboration with the Malta College of Arts, Science & Technology (MCAST). This course is specifically targeted to develop people who are currently working in other industries as well as others who want to immediately enter the aviation industry and become qualified in less than a year.

**Following the successful completion of the training course, candidates will have the opportunity to be employed by the Company.**

An exciting opportunity for individuals interested to enter the aviation

Obtaining an aviation qualification

Selected Candidates will be paid a salary whilst pursuing their studies

A career working with Lufthansa Technik Malta upon successful completion of the programme

On the job training Experience working on a narrow body or wide body aircraft under the supervision of a mentor

Attractive working conditions

**DESIGNED FOR SUCCESS:** Seamlessly Integrating Theoretical and Practical Training to Propel Your Career Journey in the Aviation Industry.

### TRAINING PROGRAMME

**Commencement Date:** September 2025

**Course Content:** This training programme is split into two parts:

1. Award in Basic Aviation Maintenance (1 semester)
2. Diploma in Aircraft Systems Maintenance (2 semesters)

**The first part** of the training programme is the Award in Basic Aviation which will provide the basic knowledge and training required to start the Diploma and be able to perform on the job training on the aircraft.

**The second part** of the training will be the Diploma in Aircraft Systems Maintenance which will incorporate the EASA Part-66 Category A basic course which will allow a candidate to sit for the licence examinations.

With mentoring and practical experience at LTM and MCAST, both of which include combined theoretical and practical sessions. This course can lead to the position of Aircraft Mechanic within 15 months.

**Entry Criteria:** • SEC/ GCSE Level of Education  
AND / OR

- Experience and hands on knowledge working in another technical area.

Selected Candidates will be paid a salary based on the years of experience of the individual in any other trade whilst pursuing their studies. Following the successful completion of the training course, candidates will continue to be employed by the Company.

If you are interested in this exciting opportunity, please send your Curriculum Vitae together with a covering letter informing us about your interest in applying to the training.
