

LEAP-1A Nacelles

The powerhouse in
MRO-services

The LEAP-1A engine will be the star of the skies for years to come. Building on its existing cooperation with Safran Nacelles, Lufthansa Technik is now a member of the licensed MRO network. This new long-term license agreement enables Lufthansa Technik to continue providing its customers with state of the art MRO services.

This agreement provides Lufthansa Technik with extensive access to repair procedures, technical support and exclusive materials to perform repairs, modifications and warranty work.

Expanding upon the existing LEAP-1A spare pool, the newly secured access to the OEM's pool enables Lufthansa Technik to provide operators spare availability from an unrivaled worldwide network of nacelle spares.

With more than 3,600 A320neo deliveries and firm orders for aircraft equipped with LEAP-1A engines and nacelles from more than 111 different customers, Lufthansa Technik has reaffirmed its commitment to provide its valued customers with the highest level of parts availability and MRO services.
