

Lufthansa Technik

**Globally
connected.
Locally
delivered.**

Aircraft Component
Services in Asia-Pacific

Excellence in Motion

Lufthansa Technik delivers the full spectrum of component services right at your doorstep. Our Asian locations are strategically positioned to perform repairs and overhauls for your local fleet. They are fully connected to a global supply network, enabling us to act as one stop shop solution to all your component needs.

Managing all component tasks across fleets, platforms and suppliers can be complex and resource-intensive. Lufthansa Technik brings everything together covering the entire spectrum of component services under one roof.

Our maintenance services combine in-house capabilities with a strong OEM and MRO supplier network. With facilities in every major aviation region, we provide 24/7 support wherever it is needed. Local workshops and warehouses are fully integrated into our global materials and engineering network, ensuring certified maintenance, reliable component supply throughout the entire component lifecycle. And to give even the smallest parts speedy wings, our own AOG Materials Desk is available 24/7.

Benefits

Full lifecycle management and material solutions

No need to micromanage individual suppliers, you only have to partner with us.

Access to the world's largest spare pool
