CALL FOR PARTICIPATION

Join the Tutorials, Workshops and Conference, hands-on live Demonstrations and in-depth technical Discussions with leading operators, manufacturers, integrators as well as various solution providers around the most recent 5G hot topics. This year we will look at the benefits and risks of this emerging disruptively agile network and service environment driven by the integration of existing and new access network technologies, new software paradigms, like edge computing, network virtualization, network slicing, and programmable 5G Core networks. Also we address the opportunities of 5G within different verticals.
